# Maryland State Normal School,

*24 N. Paca St. Baltimore.*

---

THE Act of 1865 providing a "Uniform System of Free Public Schools for the State of Maryland," made it one of the duties of the State Board of Education to organize a State Normal School "for the instruction and practice of Teachers of Public Schools in the Science of Education and the Art of Teaching and the mode of governing Schools."

In consequence of the difficulty of procuring suitable rooms, the School was not opened till the 15th of January, 1866. Commencing at that date with eleven students, the numbers steadily increased, till at the close of the session, June 8th, there were forty-eight names on the roll. There is good reason to believe that the School will re-open in September with largely increased numbers.

## Admission.

Each county is entitled to send two students for each member of the House of Delegates, and one for each Senator, making the apportionment as follows: Allegany County, 11; Anne Arundel, 5; Baltimore City, 39; Balti-

more County, 13; Calvert, 3; Caroline, 5; Carroll, 11; Cecil, 9; Charles, 3; Dorchester, 5; Frederick, 13; Harford, 9; Howard, 5; Kent, 5; Montgomery, 5; Prince George's, 5; Queen Anne's, 5; St. Mary's, 3; Somerset, 7; Talbot, 5; Washington, 11; Worcester, 7.

Persons desiring to enter the School should apply to the Board of School Commissioners of their respective counties. Applicants must be at least sixteen years of age (seventeen, if young men,) and must give evidence of good moral character and a fair elementary education. If the quota of any county is filled, candidates from that county should apply to the State Superintendent, accompanying their application with a letter of recommendation from the County Board of School Commissioners.

### Expenses.

Those who pledge themselves to teach in the Public Schools of the State have nothing to pay for Tuition or Books. A limited number of Students will be received without such a pledge, on paying \$25 a session, and furnishing their own books. Boarding may be had in the city at from four to five dollars a week.

### Sessions, Vacations, &c.

The Fall Session will commence on *Monday, September 17*, and end on the *20th of December*. The Winter Session will commence *Monday, January 7th*, and end on the *5th of April*. There will be a Summer Session (of the Preparatory Class only) commencing *April 8th*, and ending *June 28th*.

## Course of Instruction.

### ACADEMIC.

Although the main object of the Normal School is "not to educate teachers in studies now required by law, but to receive such as are found competent in these studies, and to train them in the best methods of teaching and conducting Public Schools;" yet it has been considered necessary under present circumstances to devote a considerable portion of time to Academic instruction. In the Preparatory and the Junior Class a rapid review is made of elementary studies,—Spelling, Reading, Writing, Arithmetic, Geography, Grammar, History; not only for the purpose of refreshing the memory of the Students, but also to afford an opportunity of illustrating, practically and in detail, some of the best methods of presenting these subjects to the minds of children.

The Academic studies of the Senior Class, for the present year, will be Algebra, Geometry, Rhetoric, English Literature and the Natural Sciences.

In all the classes special attention is given to Drawing, Vocal Music, and Calisthenics, with the view of enabling teachers to introduce these subjects into Primary and Grammar Schools.

### PROFESSIONAL.

While the outline of the Course of Instruction corresponds, at least in part, with that of our best High Schools, the purpose and aim of the High and the Normal School are essentially different. In the High School, the aim of the Teacher is to communicate knowledge; in the Normal School, it is to cultivate the power of communicating knowledge. In the High School, the object of the student is to

learn, so as to know; in the Normal School it is to learn, so as to teach. The purpose of the High School is to produce good, intelligent, well-informed citizens; the purpose of the Normal School is to produce good, efficient, and zealous Teachers. There is therefore no antagonism, no room even for competition, between the High and the Normal School; for though dealing with the same subjects, they pursue different ends and by different means. A sound elementary education is a good preparation for the Normal School; a thorough High School course is still better; and it is hoped that before long, a High School diploma or its equivalent will be necessary to secure admission to the State Normal School.

The subjects embraced in the more strictly Professional part of the Course are the History of Public Schools and Popular Education; the Philosophy of Mind, so far as it furnishes the foundation of Educational Theories; Education, as a Positive Science; Teaching, as an Art; Methods of Instruction, Classification, Government, and Discipline; The School Law of Maryland in its relation to Citizens, Teachers, and School Officers; the Duties and Qualifications of Public School Teachers.

The Science of Education is still in its infancy. The principles on which it is based, founded as they are on the unchangeable laws of mind, are easily apprehended, and command assent as soon as they are announced. But the best mode of carrying them into effect is still a matter of experiment. The Faculty of the Normal School therefore disclaim all intention of making teachers to order, of pronouncing in every instance which is the right way of teaching every subject, or of deciding in every case the proper method of dealing with all the practical difficulties of the school-room. It is their wish to extend and multiply the facilities of the teacher, and not to cramp his energies by

adherence to a rigid formalism. Their object is rather to eradicate the dogmatism of the past than to inculcate a newer, even though it be a better dogmatism. They seek (as the very first step in the march of improvement) to break up the pernicious routine, by which, from generation to generation, each following blindly in the steps of its predecessor, false methods have become so hallowed by custom, that all intelligent investigation has been checked. They endeavor to substitute the precepts of Nature, Reason, and Philosophy for the absurd demands of tradition. Their aim is not to convert their students into pedants and martinets, (of whom there are enough already) but to call into the liveliest exercise the peculiar talents of every individual, and to bring these talents, under the direction of a sound Philosophy, to bear upon the work of the Teacher. They think that the Soldiers of the Army of Education should be not merely well-drilled operators, but active thinkers, intelligent workers, accustomed to use their own faculties, and to follow the dictates of enlightened common sense. Above all things, do they consider it important that teachers should form a high ideal of their position and duties; that it should be well understood that the days of mere school-keeping and lesson-hearing are numbered; that oral instruction must to a certain extent take the place of memoriter recitations; that the teacher is no longer to confine himself to the text-book as the beginning and the end of all that is to be taught and learned; that the teacher as a moral and intellectual agent must come sometimes into *direct* contact with his scholars as moral and intellectual subjects, and not always through the medium of a book; and that want of success in the government or instruction of a school is an indication of incompetency on the part of the teacher.

They seek also to combat the old and dangerous heresy, that the communication of knowledge is the sole or even the

main object of the educator. They sincerely believe and earnestly teach that the amount of book-learning usually obtained at school is but of small importance compared with the moral and intellectual *habits* which are there acquired. They would make the direct acquisition of knowledge in school subordinate to the development of the power and desire to use that knowledge and to add to it after leaving school,—regarding the one as money locked up in a strong box, of which the key may happen to be lost, the other as money invested in good securities at compound interest.

They earnestly endeavor to impress upon their students, that the cultivation of the intellectual powers is only part of a teacher's work. The physical well-being of the scholar is entrusted to the teacher during school hours, and, as far as he can control it, after school hours; and the laws of health are as necessary to be taught as the laws of Grammar. The conscience needs the guiding hand of the teacher as well as the reason; the duties of the child to society, to his country and his God, need to be explained and enforced as well as his duties to teachers and parents.

### Library, Apparatus, etc.

A beginning of a library has been made; and additions are expected every year.

A considerable amount of Chemical and Philosophical Apparatus has already been procured; and funds are in hand to purchase, at an early date, whatever is necessary to place this department in a state of complete efficiency.

It is the intention of the Board to form, in connexion with the Normal School, an Educational Museum, where every valuable novelty or improvement in Educational apparatus will be collected.

# Maryland State Normal School,

*24 North Paca Street, Baltimore.*

---

THE Act of 1865 providing a "Uniform System of Free Public Schools for the State of Maryland," made it one of the duties of the State Board of Education to organize a State Normal School "for the instruction and practice of Teachers of Public Schools in the Science of Education and the Art of Teaching and the mode of governing Schools."

## Admission.

Each county is entitled to send two students for each member of the House of Delegates, and one for each Senator, making the apportionment as follows: Allegany County, 11; Anne Arundel, 5; Baltimore City, 39; Baltimore County, 13; Calvert, 3; Caroline, 5; Carroll, 11; Cecil, 9; Charles, 3; Dorchester, 5; Frederick, 13; Harford, 9; Howard, 5; Kent, 5; Montgomery, 5; Prince George's, 5; Queen Anne's, 5; St Mary's, 3; Somerset, 7; Talbot, 5; Washington, 11; Worcester, 7.

Persons desiring to enter the School should apply to the Board of School Commissioners of their respective counties. Applicants must be at least sixteen years of age (seventeen, if young men,) and must give evidence of good moral character and a fair elementary education. If the quota of any county is filled, candi-

dates from that county should apply to the State Superintendent, accompanying their application with a letter of recommendation from the County Board of School Commissioners.

### Sessions, Vacations, &c.

The Fall Session will commence on *Monday, September 16th*, and end on the *20th of December*. The Winter Session will commence *Monday, January 6th*, and end on the *5th of April*.

### Expenses.

Those who pledge themselves to teach in the Public Schools of the State have nothing to pay for Tuition or Books. A limited number of Students will be received without such a pledge, on paying \$25 a session, and furnishing their own books.

### Boarding.

Boarding in the City costs \$4 a week and upwards, according to accommodations. A small number of Students will be received into the family of one of the Teachers. To secure a place, application should be made to the Principal (by letter) before the *1st of September*.

### Course of Instruction.

Although the main object of the Normal School is "not to educate teachers in studies now required by law, but to receive such as are found competent in these studies, and to train them in the

best methods of teaching and conducting Public Schools;" yet it has been considered necessary under present circumstances to devote a considerable portion of time to Academic instruction. In the Junior Class a rapid review is made of elementary studies: Spelling, Reading, Writing, Arithmetic, Geography, Grammar, History; not only for the purpose of refreshing the memory of the Students, but also to afford an opportunity of illustrating, practically and in detail, some of the best methods of presenting these subjects to the minds of children.

The Academic studies of the Senior Class, for the present year, will be Algebra, Geometry, Rhetoric, English Literature and the Natural Sciences.

In all the classes special attention is given to Drawing, Vocal Music, and Calisthenics, with the view of enabling teachers to introduce these subjects into Primary and Grammar Schools.

The subjects embraced in the more strictly Professional part of the course are the History of Public Schools and Popular Education; the Philosophy of Mind, so far as it furnishes the foundation of Educational Theories; Education, as a Positive Science; Teaching, as an Art; Methods of Instruction, Classification and Government; The School Law of Maryland in its relation to Citizens, Teachers, and School Officers; the Duties and Qualifications of Public School Teachers.

### Library, Apparatus, etc.

The Library is increasing slowly, but steadily.

The Chemical Apparatus is extensive, and amply sufficient for the wants of the School.

The Philosophical Apparatus has been largely increased during the present year; and it is intended to make, from time to time, such further additions as may be necessary.

### Model School.

The Model School which has been in operation since September, 1866, has been of great service to the Students, giving them the advantage of seeing the principles which they have learned theoretically, carried into practice in the School Room. Arrangements have been made for conducting the School on a larger scale and in a more convenient location during the coming year, and it is hoped that the usefulness of the School will be increased in a corresponding degree.

Each County is entitled to send two students for each of its representatives in the General Assembly.

The apportionment is as follows:

Allegany County, 12; Anne Arundel, 8; Baltimore County, 14; Baltimore City, 42; Calvert County, 6; Caroline, 6; Carroll, 10; Cecil, 10; Charles, 6; Dorchester, 8; Frederick, 14; Harford, 10; Howard, 6; Kent, 6; Montgomery, 8; Prince George's, 8; Queen Anne's, 6; Saint Mary's, 6; Somerset, 6; Talbot, 6; Washington, 12; Wicomico, 6; Worcester, 6.

Persons desiring to enter the School should make application to the Board of School Commissioners of their respective counties. The Law requires the appointees to be not less than sixteen years of age if young women, and not less than seventeen if young men. They should have a good elementary education, and must "file a written declaration that their object in obtaining admission is to qualify themselves as Public School Teachers, and that it is their intention to engage in the profession of teaching within the State."

When the legal quota of any County is filled, applicants from that County should address the Principal, enclosing a letter of recommendation from the County Board of School Commissioners.

### Sessions.

The School year of nine months is divided into two sessions. The Fall Session commences on the first Tuesday in September. The Winter Session commences on the second Tuesday in January, and closes on the last Friday in May.

Students will be admitted to entrance in the first week of each session, and not at any other time, unless previous arrangements have been made with the Principal to that effect.

Exception will be made in favor of persons engaged in teaching, who will be received at the close of any of their regular School terms, previous to the first of March.

### Expenses.

Students appointed by the County Boards or by the Baltimore City Board, are under no expense for Tuition, Books and School Stationery.

In addition to the regular appointees, a limited number of students will be received of the proper age and scholastic acquirements, who shall pay twenty-five dollars per session for tuition, and purchase their own text books.

Such students will not be required to file the declaration referred to above.

### Boarding.

Students whose parents or near relatives do not reside in the city will be required to board in the Boarding House connected with the Normal School, or in such families as may be approved by the Principal.

The Normal School Boarding House is for ladies exclusively. The charge will not exceed \$4.50 a week for Board, Light and Fuel.

It is under the care of one of the lady Professors, who will insure to the inmates all the comforts and conveniences of a well regulated home.

Students desiring board will give ten days notice to the Principal, and the same before leaving.

### Course of Instruction.

The Course embraces all the studies required by the School Law to be taught in the Public Schools of the State, namely: Orthography, Reading, Writing, English Grammar, Geography, History, Algebra, Book-Keeping, Physiology, Vocal Music and Drawing. Such other studies will be added from time to time as the progress of the students will justify. But a thorough mastery of the elements of school-learning is considered to be of much greater importance than a superficial knowledge of the so-called "higher branches."

Inquiries are often made regarding the length of time required to complete the Course. It is impossible to give a definite answer to this question. The examination for diplomas is open to all students in good standing who have been at the School for one session of four and a half months. The examination is made searching and rigid, and if the students have the requisite knowledge, it is not considered of any importance how long they have been in obtaining it. Past experience shews that while some students have graduated in one year, the majority require two years.

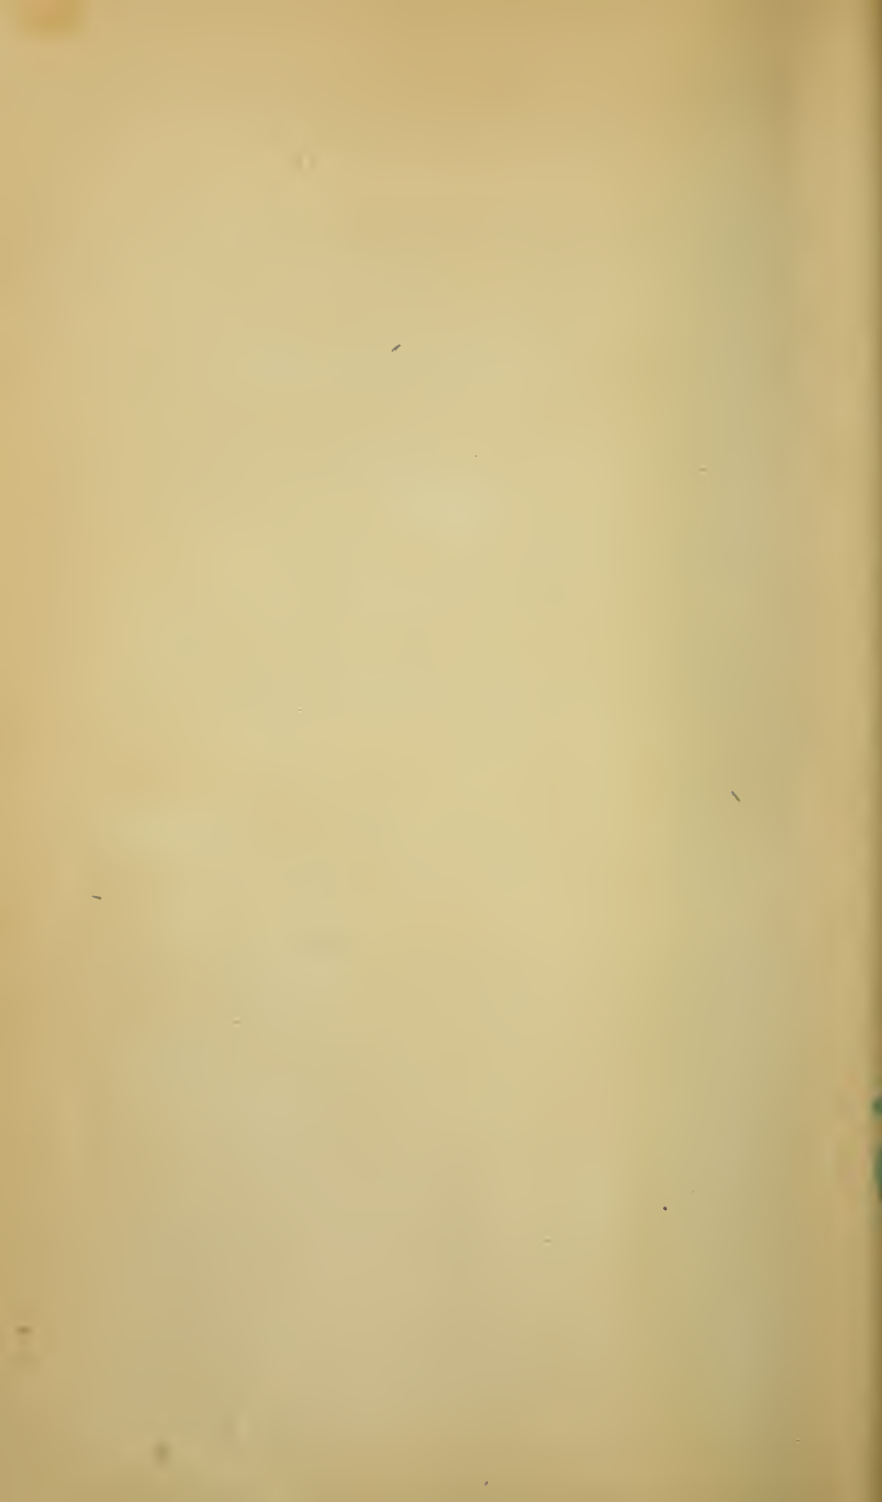

The object of the School being not to afford a liberal education to the citizens, but to give professional training to those who intend to become teachers, all the departments of study are considered but as means to this end. The diploma of the School is not

given on account of regular attendance merely, nor even of high attainments, but on the ground of a fairly developed capacity for teaching and governing, in addition to the requisite amount of scholarship. For this reason every student who proposes to graduate is required to make the theory and practice of teaching the subject of special study for at least half a session. The Model School offers great facilities for obtaining the necessary practice in the art of teaching; and it is required that all graduates spend one term as teachers in this School under proper superintendence.

MARYLAND  
STATE NORMAL SCHOOL,

*24 NORTH PACA STREET, BALTIMORE.*

---

THE MARYLAND STATE NORMAL SCHOOL, established by the School Law of 1865, and re-organized under the Law of 1868, is intended "for the instruction and practice of teachers in the science of education, the art of teaching and the mode of governing schools."

**ADMISSION.**

Each County is entitled to send two students for each of its representatives in the General Assembly.

The apportionment is as follows:

Allegany county, 12; Anne Arundel, 8; Baltimore county, 14; Baltimore city, 42; Calvert county, 6; Caroline, 6; Carroll, 10; Cecil, 10; Charles, 6; Dorchester, 8; Frederick, 14; Harford, 10; Howard, 6; Kent, 6; Montgomery, 8; Prince George's, 8; Queen Anne's, 6; Saint Mary's, 6; Somerset, 6; Talbot, 6; Washington, 12; Wicomico, 6; Worcester, 6.

Persons desiring to enter the School should make application to the Board of School Commissioners of their respective

counties. The Law requires the appointees to be not less than sixteen years of age, if young women, and not less than seventeen, if young men. They should have a good elementary education, and must "file a written declaration that their object in obtaining admission is to qualify themselves as Public School Teachers, and that it is their intention to engage in the profession of teaching within the State."

When the legal quota of any County is filled, applicants from that County should address the Principal, enclosing a letter of recommendation from the County Board of School Commissioners.

### **SESSIONS.**

The School year of nine months is divided into two sessions. The Fall Session commences on the first Tuesday in September. The Winter Session commences on the second Tuesday in January, and closes on the last Friday in May.

Students will be admitted to entrance in the first week of each session, and not at any other time, unless previous arrangements have been made with the Principal to that effect.

Exception will be made in favor of persons engaged in teaching, who will be received at the close of any of their regular School terms, previous to the first of March.

### **EXPENSES.**

Students appointed by the County Boards, or by the Baltimore City Board, are under no expense for Tuition, Books and School Stationery.

In addition to the regular appointees, a limited number of students will be received of the proper age and scholastic acquirements, who shall pay twenty-five dollars per session for tuition, and purchase their own text books.

Such students will not be required to file the declaration referred to above.

**BOARDING.**

Students whose parents or near relatives do not reside in the city will be required to board in the Boarding House connected with the Normal School, or in such families as may be approved by the Principal.

The Normal School Boarding House is for ladies exclusively. The charge will not exceed \$4.50 a week for Board, Light and Fuel.

It is under the care of Mrs. Borgman, Principal of the Model School, who will insure to the inmates all the comforts and conveniences of a well regulated home.

Students desiring board will give ten days' notice, and the same before leaving. Address, MRS. BORGMAN, No. 261 Madison avenue, Baltimore.

**COURSE OF INSTRUCTION.**

The course embraces all the studies required by the School Law to be taught in the Public-Schools of the State, namely: Orthography, Reading, Writing, English Grammar, Geography, History, Algebra, Book-Keeping, Physiology, Natural Philosophy, Vocal Music and Drawing. Such other studies will be added from time to time as the progress of the students will justify. But a thorough mastery of the elements of school learning is considered to be of much greater importance than a superficial knowledge of the so-called "higher branches."

Inquiries are often made regarding the length of time required to complete the Course. It is impossible to give a definite answer to this question. The examination for diplomas is open to all students in good standing who have been at the School for one session of four and a half months. The examination is made searching and rigid; and if the students have the requisite knowledge, it is not considered of any

importance how long they have been in obtaining it. Past experience shews that, while some students have graduated in one year, the majority require two years.

The object of the School not being to afford a liberal education to the citizens, but to give professional training to those who intend to become teachers, all the departments of study are considered but as means to this end. The diploma of the School is not given on account of regular attendance merely, nor even of high attainments, but on the ground of a fairly developed capacity for teaching and governing, in addition to the requisite amount of scholarship. For this reason every student who proposes to graduate is required to make the theory and practice of teaching the subject of special study for at least half a session. The Model School offers great facilities for obtaining the necessary practice in the art of teaching; and all graduates are required to spend one term as teachers in this School under proper superintendence.

## PARSING.

(PARSE THE WORDS IN ITALICS.)

They say I want for naught,  
 I *have* the *parish* pay; but I am dull  
 Of *hearing*, and the fire *scarce* warms me *through*.  
 God *save* me—I have been a sinful *man*,—  
 And save the lives of them *that* still can work,  
*For* they are good to me; ay, good to me.  
 But *Lord*, I am a trouble! and I sit,  
 And I am lonesome; and the nights are few  
*That* any *think* to *come* and draw a chair  
 And *sit* in my poor place and talk *awhile*.  
 Why should they *come* *forsooth*? *Only* the wind  
 Knocks at my door; oh, long and *loud* it knocks,  
 The only *thing* God *made* that has a mind  
 To enter in.

## ANALYSIS.

ANALYZE THE FOLLOWING PARAGRAPH:

The man whose eye  
 Is ever on himself doth look on one,  
 The least of Nature's works; one who might move  
 The wise man to that scorn which wisdom holds  
 Unlawful, ever. O be wiser, thou!  
 Instructed that true knowledge leads to love;  
 True dignity abides with him alone  
 Who, in the silent hour of inward thought,  
 Can still suspect, and still revere himself,  
 In lowliness of heart.

1. Mention the special uses of the Day-Book, Journal, and Ledger.
2. Give the three principal classes of business transactions, with the rule for each.

✓ 3. Journalize and post the following Day-Book entry:

Bot. of Jas. Smith & Co.

100 bbls. Flour @ \$12.50.....\$1250.00

Paid cash in part.....\$500

My note at 3 mo..... 500

The remainder is on acc't.. 250

4. What is shown by the Dr. side, what by the Cr. side, and what by the balance of the following accounts: Cash, Mdse., Profit and Loss, Jas. Smith?
5. For what purpose, in what order, and how are the Ledger accounts closed?

## ALGEBRA.

- ✓ 1. Multiply  $a^m x^{\frac{p}{q}} + b^n y$  by  $a^{-m} x^{\frac{p}{2q}} - b^n y^{-1}$ .
2. Prove that any quantity having zero for its exponent is equal to unity.
3. Divide  $x^{-3} y^{-a} z^{a-b}$  by  $x^{-4} y^a z^{2a-b}$ .
4. Divide  $x^m + px^{m-1} + qx^{m-2} + rx^{m-3} + \&c... + tx + u$  by  $x-a$ .
5. Decompose into factors  $x^2 - x - 42$ .
6. Given  $\frac{x}{a} - \frac{x}{b} + \frac{x}{c} = \frac{x}{2a} - \frac{x+c}{2b}$  to find  $x$ .
7. Given  $\left. \begin{array}{l} ax + by = c \\ a'x + b'y = c' \end{array} \right\}$  to find  $x$  and  $y$ .
8. Given  $x - \sqrt{xy} + y - \sqrt{x} + \sqrt{y} = 0$ ;  
 $\sqrt{x} + \sqrt{y} = 5$ : to find  $x$  and  $y$ .
9. Expand into an infinite series  $\frac{1 + 2x}{1 - 3x}$ .
10. Find the equation whose roots are less by 10 than the roots of the equation,  $x^4 + 2x^3 + 3x^2 + 4x - 12340 = 0$ .
11. Find the equation whose roots shall be 7,— 3,— 4, 6.
12. The first term of an arithmetical series is  $\frac{1}{2}$ , the common difference  $\frac{1}{3}$ , find the 100th term and the sum of the series.

## GEOMETRY.

1. Every line drawn through the intersection of the diagonals of a parallelogram, bisects the parallelogram.
2. The square of the hypotenuse of a right angled triangle is equal to the sum of the square of the other sides.
3. The angle at the centre of a circle is double the angle at the circumference, standing on the same arc.
- ✓ 4. The opposite angles of a quadrilateral inscribed in a circle are equal to two right angles.
- ✓ 5. The sides about the equal angles of equiangular triangles are proportional.

- ✓ 9. Draw one of the following maps, from memory: Europe, Asia, Africa, North America, South America, the British Isles.

## CHEMISTRY.

1. What are the sources of heat—its effects—the principal laws by which it is regulated?
2. Describe the thermometer—the mode of construction, and the principle upon which it acts.
3. Explain latent heat, and give examples.
4. Explain the effects of atmospheric pressure on the boiling point of liquids.
5. Explain the principle on which the elements are divided into Monads, Dyads, &c. Give the most important elements in each class.
6. Describe the atmosphere. Of what elements is it composed, and in what proportions?
7. Describe oxygen. Give its history, and the method of obtaining it. Describe some experiments illustrating its properties.
8. When, and by whom was Nitrogen first discovered? Mention its properties, and the method of obtaining it.
9. Describe Carbonic anhydride—its properties—and various methods of obtaining it.
10. Give the symbols for nitrous oxide, carbonic oxide, sulphuric anhydride, sulphuric acid, ammonia, hydrochloric acid, nitric acid.
11. Give the equations which represent the processes of making oxygen, hydrogen, and carbonic anhydride.
- ✓ 12. Explain the following equations:
 
$$2 \text{ Mn O}_2 + 2 \text{ H}_2 \text{ SO}_4 = 2 \text{ Mn SO}_4 + 2 \text{ H}_2 \text{ O} + \text{ O}_2.$$

$$2 \text{ Na Cl} + \text{ Mn O}_2 + 3 \text{ H}_2 \text{ SO}_4 = 2 \text{ Na HSO}_4 + \text{ Mn SO}_4 + 2 \text{ H}_2 \text{ O} + \text{ Cl}_2.$$

$$3 \text{ Fe} + 4 \text{ H}_2 \text{ O} = \text{ Fe}_3 \text{ O}_4 + 4 \text{ H}_2.$$

## THEORY OF TEACHING.

1. What are the most important qualifications of a teacher?
2. What is the main end of education?
3. Mention some of the right uses and some of the wrong uses that are made of text books.
4. Give the arguments for and against requiring home lessons from children.

MARYLAND  
STATE NORMAL SCHOOL,

24 NORTH PACA STREET, BALTIMORE.

THE MARYLAND STATE NORMAL SCHOOL, established by the School Law of 1865, and re-organized under the Law of 1868, is intended "for the instruction and practice of teachers in the science of education, the art of teaching and the mode of governing schools."

ADMISSION.

Each County is entitled to send two students for each of its representatives in the General Assembly.

The apportionment is as follows:

Allegany county, 12; Anne Arundel, 8; Baltimore county, 14; Baltimore city, 42; Calvert county, 6; Caroline, 6; Carroll, 10; Cecil, 10; Charles, 6; Dorchester, 8; Frederick, 14; Harford, 10; Howard, 6; Kent, 6; Montgomery, 8; Prince George's, 8; Queen Anne's, 6; St. Marys, 6; Somerset, 6; Talbot, 6; Washington, 12; Wicomico, 6; Worcester, 6.

Persons desiring to enter the School should make application to the Board of School Commissioners of their respective

counties. The Law requires the appointees to be not less than sixteen years of age, if young women ; and not less than seventeen, if young men. They should have a good elementary education, and must " file a written declaration that their object in obtaining admission is to qualify themselves as Public School Teachers, and that it is their intention to engage in the profession of teaching within the State."

When the legal quota of any County is filled, applicants from that County should address the Principal, enclosing a letter of recommendation from the County Board of School Commissioners.

#### SESSIONS.

The School year of nine months is divided into two sessions. The Fall Session commences on the first Tuesday in September. The Winter Session commences on the second Tuesday in January, and closes on the last Friday in May.

Students will be admitted to entrance in the first week of each session, and not at any other time, unless previous arrangements have been made with the Principal to that effect.

Exception will be made in favor of persons engaged in teaching, who will be received at the close of any of their regular School terms, previous to the first of March.

#### EXPENSES.

Students appointed by the County Boards, or by the Baltimore City Board, are under no expense for tuition, Books, and School Stationery.

In addition to the regular appointees, a limited number of students will be received of the proper age and scholastic acquirements, who shall pay twenty-five dollars per session for tuition, and purchase their own text books.

Such students will not be required to file the declaration referred to above.

### BOARDING.

Students whose parents or near relatives do not reside in the city will be required to board in the Boarding House connected with the Normal School, or in such families as may be approved by the Principal.

The Normal School Boarding House is for ladies exclusively. The charge will not exceed \$4.50 a week for Board, Light and Fuel.

It is under the care of Mrs. Borgman, Principal of the Model School, who will insure to the inmates all the comforts and conveniences of a well regulated home.

As the number of Students who can be received as Boarders is limited, those desiring board should make early application to the Principal. At least ten days' notice must be given, before entering or leaving.

### COURSE OF INSTRUCTION.

The course embraces all the studies required by the School Law to be taught in the public Schools of the State, namely: Orthography, Reading, Writing, English Grammar, Geography, History, Algebra, Book-Keeping, Physiology, Natural Philosophy, Vocal Music and Drawing. Such other studies will be added from time to time as the progress of the students will justify. But a thorough mastery of the elements of school learning is considered to be of much greater importance than a superficial knowledge of the so-called "higher branches."

Inquiries are often made regarding the length of time required to complete the Course. It is impossible to give a definite answer to this question. The examination for diplomas is open to all students in good standing who have been at the School for one session of four and a half months.

The examination is made searching and rigid ; and if the students have the requisite knowledge, it is not considered of any importance how long they have been in obtaining it. Experience shows that, while some students have graduated in one year, the majority require two years.

The object of the School not being to afford a liberal education to the citizens, but to give professional training to those who intend to become teachers, all the departments of study are considered but as means to this end. The diploma of the School is not given on account of regular attendance merely, nor even of high attainments, but on the ground of a fairly developed capacity for teaching and governing, in addition to the requisite amount of scholarship. For this reason every student who proposes to graduate is required to make the theory and practice of teaching the subject of special study for at least half a session. The Model School offers great facilities for obtaining the necessary practice in the art of teaching ; and all graduates are required to spend one term as teachers in this School under proper superintendence.

M. A. NEWELL,

*Principal of the Maryland State Normal School,*

BALTIMORE, MD.

# QUESTIONS

*Proposed at the Final Examination, May, 1870,—open to all Students,—and by which their standing as printed was ascertained.*

NOTE.—The Questions on Geometry and Trigonometry were given to the First Division of the Senior Class only; the Junior Class was not examined in Chemistry, Natural Philosophy, Physiology, and Theory of Teaching.

## PARSING.

(PARSE THE WORDS IN ITALICS.)

Could great men thunder  
 As Jove himself *does*, Jove would ne'er be quiet,  
 For every pelting, petty officer  
 Would use his heaven for thunder: *nothing* but thunder—  
 Merciful *Heaven*!  
 Thou rather, with thy sharp and sulphurous bolt,  
 Split'st the unwedgable and gnarled oak,  
 Than the soft *myrtle*! Oh! but man, proud *man*,  
*Drest* in a little brief authority—  
 Most ignorant of *what* he's most assured,—  
 His glassy *essence*,—like an angry ape,  
 Plays such fantastic tricks before high heaven,  
 As make the *angels* weep.

## GRAMMATICAL ANALYSIS.

(ANALYZE THE FOLLOWING SENTENCE.)

Philosophy is a goddess whose head indeed is in heaven, but whose feet are upon earth; she attempts more than she accomplishes; and promises more than she performs; she can teach us to hear of the calamities of others with magnanimity; but it is religion only that can teach us to bear our own with resignation.

## ARITHMETIC.

1. Subtract  $\frac{7}{8}$  of  $3\frac{3}{4}$  from  $\frac{3}{4}$  of  $\frac{1}{2}$  of  $9\frac{1}{2}$ .
2. What cost  $\frac{7}{8}$  of a yard of cloth, if  $\frac{5}{8}$  of a yard cost  $7\frac{1}{2}$  dollars?
3. How many cords of wood at \$5.12 $\frac{1}{2}$  a cord must a man give for 91.25 bushels of wheat at \$1.40 a bushel, and 85 bushels of rye at \$1.25 a bushel?

4. How many cannon balls, each weighing 41 lbs.  $10\frac{3}{4}$  oz. can be made out of a ton of iron?

5. A man bought 57 cwt. 3 qr. 15 lbs. sugar at 6 cts. per lb. and sold  $\frac{1}{2}$  of it at 8 cts. a pound,  $\frac{1}{3}$  of it at  $8\frac{1}{2}$  cts. a pound, and the remainder at cost; how much did he gain?

6. If \$16,236 be divided into two parts to each other as  $\frac{5}{6}$  to  $\frac{7}{8}$ , it will respectively give 1% of A's and  $1\frac{1}{2}$  of B's money; how much money has each?

7. By selling a house for \$16,872 I gain 14 per cent.; how much would I have received for it, if I had lost 14 per cent.

8. The interest on  $\frac{3}{4}$  of C's money and  $\frac{3}{4}$  of D's money for 7 years and 4 months at 8 per cent. is \$5,280; how much money has each if  $\frac{3}{4}$  of C's equals  $\frac{3}{4}$  of D's?

9. A pole was broken 52 feet from the bottom, and fell so that the end struck 39 feet from the foot, required the length of the pole?

10. Required the internal diameter of a hollow sphere of copper which shall hold 100 gallons.

## BOOK-KEEPING.

1. Explain the difference between Book-keeping by Single and by Double entry.

2. Name all the circumstances under which a person is Dr.? Under which person is Cr.? Under which a thing is Dr.? Under which a thing is Cr.?

3. Journalize the following:

April 26th. The Chesapeake Bank has this day discounted James Smith's Note, in my favor, drawn March 1st, at 90 days for \$450. Received Cash \$

5. Make a detailed statement of the object, and method, of closing the Ledger accounts. X How is Mdse. account closed when the goods are partly sold and partly unsold

# ALGEBRA.

1. Multiply  $x^3 - ax^2 + bx - c$  by  $x^2 - dx + e$ .
2. Divide  $x^{-5}y^{-n}z^{-q-3}$  by  $x^{-7}y^{-m}z^{-p}$ .
3. Divide  $x^3 + ax^2 + bx + c$  by  $x - r$ .
4. Divide 1 by  $1 - x$ , and find the numerical value of each of the first six terms of the resulting series, and also of the sum of the entire series; putting  $x = \frac{3}{4}$ ,  $\frac{1}{2}$ , and  $\frac{1}{4}$  successively.
5. Write  $\frac{2x^m}{3y^{n-q}z^{-5}}$  in one line.
6. Expand  $\sqrt{x+a}$  in a series by the binomial theorem.
- 8 Given  $\frac{a+3x}{4a} - \frac{7a-5x}{6b} + 3 - \frac{9x}{4} = \frac{x}{ab} + \frac{5x}{6b}$ ; find the value of  $x$ .
8. Given  $\begin{cases} \frac{a}{x} + \frac{b}{y} = m \\ \frac{x}{e} + \frac{y}{d} = n \end{cases}$ ; find the value of  $x$  and  $y$ .
9. Given  $\frac{x}{\sqrt{x+\sqrt{a-x}}} + \frac{x}{\sqrt{x-\sqrt{a-x}}} = \frac{b}{\sqrt{x}}$ ; find the values of  $x$ .
10. Find one root of the equation  $x^3 + x^2 + x - 100 = 0$ .

# GEOMETRY.

1. Parallelograms having equal bases and altitudes are equal in area.
2. If the square of one side of a triangle be equal to the sum of the squares of the other two sides, the angle contained by those sides is a right angle.
3. The complements of the parallelograms, which are about the diagonal of any parallelogram are equal to one another.
4. If through a point within a circle any chord be drawn, the rectangle contained by the segments of the chord is a constant quantity.
5. Similar triangles are to each other as the squares of their homologous sides.

## TRIGONOMETRY.

1. Define *sine*, *tangent*, *secant*.
2. Prove that the secant and cosine are reciprocals; also the tangent and cotangent.
3. Given  $a = 31.005$ ,  $b = 15.1101$ ,  $C = 10^\circ 15'$ ; find  $A$  and  $B$ .
4. Given  $a = 10$ ,  $b = 12$ ,  $c = 14$ ; find the angles.
5. The mean horizontal parallax of the moon is  $57' 2''$ .  
Find the distance of the moon from the earth, taking the earth's radius as 3,963 miles.

## PHYSIOLOGY.

1. Describe the spinal column and its use.
2. Describe the structure and action of the muscles.
3. Name the digestive organs. Give their general structure and arrangement.
4. Describe the various parts of the process of digestion.
5. What is meant by *absorption*? Describe the means by which it is accomplished.
6. Name and describe the organs of circulation.
7. Make a drawing of the heart, showing its principal parts.

MARYLAND  
STATE NORMAL SCHOOL,

*24 NORTH PACA STREET, BALTIMORE.*

THE MARYLAND STATE NORMAL SCHOOL, established by the School Law of 1865, and reorganized under the Law of 1868, is intended "for the instruction and practice of teachers in the science of education, the art of teaching and the mode of governing schools."

**ADMISSION.**

Each County is entitled to send two students for each of its representatives in the General Assembly.

The apportionment is as follows:

Allegany county, 12; Anne Arundel, 8; Baltimore county, 14; Baltimore city, 42; Calvert county, 6; Caroline, 6; Carroll, 10; Cecil, 10; Charles, 6; Dorchester, 8; Frederick, 14; Harford, 10; Howard, 6; Kent, 6; Montgomery, 8; Prince George's, 8; Queen Anne's, 6; Saint Mary's, 6; Somerset, 6; Talbot, 6; Washington, 12; Wicomico, 6; Worcester, 6.

Persons desiring to enter the School should make application to the Board of School Commissioners of their respective

counties. The Law requires the appointees to be not less than sixteen years of age, if young women, and not less than seventeen, if young men. They should have a good elementary education, and must "file a written declaration that their object in obtaining admission is to qualify themselves as Public School Teachers, and that it is their intention to engage in the profession of teaching within the State."

When the legal quota of any County is filled, applicants from that County should address the Principal, enclosing a letter of recommendation from the County Board of School Commissioners.

\*MUSIC.—To read at sight any Music in three sharps or flats.

### SESSIONS.

The School year of nine months is divided into two sessions. The Fall Session commences on the first Tuesday in September. The Winter Session commences on the first Wednesday in January, and closes on the last Friday in May.

Students will be admitted to entrance in the first week of each session, and not at any other time, unless previous arrangements have been made with the Principal to that effect.

---

\*Not required from new students.

Exception will be made in favor of persons engaged in teaching, who will be received at the close of any of their regular School terms, previous to the first of March.

#### **EXPENSES.**

Students appointed by the County Boards, or by the Baltimore City Board, are under no expense for tuition, books, and school stationery.

In addition to the regular appointees, a limited number of students will be received of the proper age and scholastic acquirements, who shall pay twenty-five dollars per session for tuition, and purchase their own text books.

Such students will not be required to file the declaration referred to above.

#### **BOARDING.**

Boarding can be obtained in the city at prices varying from \$4 to \$7 a week.

Mrs. Borgman, Principal of the Girls' Model School, will receive a limited number of young ladies, at the rate of \$90 for the Fall Term, and \$110 for the Winter Term. A copy of the Rules may be had on application to Mrs. Borgman, 26 Garden street.

As the number of Students who can be received as Boarders is limited, those desiring board should make early application.

#### **COURSE OF INSTRUCTION.**

The course embraces all the studies required by the School Law to be taught in the Public Schools of the State, namely: Orthography, Reading, Writing, English Grammar, Geography, History, Algebra, Book-Keeping, Physiology, Natural Philosophy, Vocal Music and Drawing. Such other studies are added from time to time as the progress of the students will justify. But a thorough mastery of the elements

of school learning is considered to be of much greater importance than a superficial knowledge of the so-called "higher branches."

Inquiries are often made regarding the length of time required to complete the course. It is impossible to give a definite answer to this question. The examination for diplomas is open to all students in good standing who have been at the School for two sessions. Experience shows that, while some students have graduated in one year, the majority require two years.

The object of the School not being to afford a liberal education to the citizens, but to give professional training to those who intend to become teachers, all the departments of study are considered but as means to this end. The diploma of the School is not given on account of regular attendance merely, nor even of high attainments, but on the ground of a fairly developed capacity for teaching and governing, in addition to the requisite amount of scholarship. For this reason every student who proposes to graduate is required to make the theory and practice of teaching the subject of special study for at least half a session. The Model School offers great facilities for obtaining the necessary practice in the art of teaching; and all graduates are required to spend one term as teachers in this School under proper superintendence.

## ETYMOLOGY.

In the following passage, mark the words which are of Saxon origin, those which come from the Latin directly, and those which come from the Latin through the French :

Imagine all nature now standing in a silent expectation to receive its last doom ! the tutelary and destroying angels to have their instructions ; everything to be ready for the fatal hour ; and then after a little silence all the host of heaven to raise their voice and sing aloud : " Let God arise ; let his enemies be scattered ; as smoke is driven away, so drive them away ; as wax melteth before the fire, so let the wicked perish at the presence of God ; " and upon this, as a signal given, all the sublunary world breaks into flames, and all the treasures of fire are opened in heaven and in earth.

Analyze the following words, and give the signification of roots and affixes :

Aloft, Bespoke, Filth, Journal, Diary, Ablution, Auctioneer, Duckling, Laboratory, Inebriate, Ecumenical, Affiliate, Confiscate, Bifurcation, Posthumous, Egregious, Oligarchy, Indelible, Armistice, Hydraulic.

## GRAMMAR.

1. What parts of speech are essential to a language?
2. What are particles? In what class of languages are they not needed?
3. Explain the word "relation" in the definition of preposition.
4. What is the difference between an adjective pronoun and a pronominal adjective?
5. Explain the division of verbs into strong and weak, and give examples.
6. Explain the formation of such tenses as slept, crept, kept. Are they strong or weak? Why?
7. What classes of verbs take two direct objects?
8. What is the origin of the possessive case?
9. Explain the two-fold origin of our infinitive mood.
10. Give examples of verbs, *transitive*, *intransitive*, *reflexive* and *impersonal*.

Correct or justify each of the following sentences, and give reasons in full:

- (a.) "Consider how each of these professions are crowded with multitudes."—*Addison*.
- (b.) "'Tis hard to say if greater want of skill  
Appear in writing or in judging ill."—*Pope*.
- (c.) "Castor, you are the first that rears your hand."—*Shakespeare*.
- (d.) "Under these hard conditions as this time is like to lay upon us."—*Shakespeare*.
- (e.) "And as John fulfilled his course he said, Whom think ye that I am."—*Bible*.
- (f.) "The wages of sin is death."—*Bible*.
- (g.) "Descent and fall to us is adverse."—*Milton*.
- (h.) "None save thou and thine, I've sworn,  
Shall be left upon the morn."—*Byron*.
- (i.) "Not to bestow my youngest daughter before I have a husband for the elder."—*Shakespeare*.
- (k.) "She is taller than me."—*Shakespeare*.

## PARSING.

Supply all the words omitted, and parse those in italics:

No *joy* so great *but* *runneth* to an end—  
No hap so hard but may in fine amend.

Not always *fall* of leaf nor ever spring;  
Not endless night, yet not eternal day;  
The saddest birds a *season* find to sing,  
The roughest *storm* a calm may soon allay.  
*Thus*, with *succeeding* turns, God tempereth all,  
*That* man may hope to rise, yet *fear* to fall.

A chance may win *that* by mischance was lost ;  
That net *that* holds no great takes little fish ;  
In some things *all*, in all things none are crossed ;  
Few *all* they *need*, but none have all they wish.  
Unmingled joys, here to no man befall ;  
Who least *hath* some ; who *most* hath never all.

Analyze the following passage :

Of man's first disobedience, and the fruit  
Of that forbidden tree, whose mortal taste  
Brought death into the world and all our woe,  
With loss of Eden, till one greater Man  
Restore us, and regain the blissful seat,  
Sing, heavenly Muse, that on the secret top  
Of Oreb, or of Sinai, didst inspire  
That Shepherd, who first taught the chosen seed,  
In the beginning, how the heavens and earth  
Rose out of Chaos.

## HISTORY OF THE ENGLISH LANGUAGE.

1. What is Natural History, and why should we study it?
2. How many departments of the study of Nature; name them?
3. How many systems of classification are there, and what is the difference between them?
4. Name the divisions of the Animal Kingdom.
5. Write a tabular form showing the divisions and subdivisions of functions.
6. Explain the structure of bone and the method of development.
7. Name the characteristics of fishes, and tell how their respiration is performed.
8. How are the muscles divided; what is their use; give a brief description of them?
9. Name the characteristics of birds; give classes, and an explanation of each class.
10. How are fossils formed? What is a fossil?

## PHYSICS.

1. State briefly the sources, effects and laws of heat.
2. What are the fixed points from which a thermometer is graduated? Explain the Fahrenheit and the Centigrade scale. Express 98° F in terms of C; and 30° C in terms of F.
3. Make a drawing of a plate electrical machine; name the parts, and describe their uses.
4. Define and explain the terms *element*, *atom*, *molecule*.
5. Explain the classification of elements according to their quantivalence, and give examples of each class.
6. Give the symbols and combining weights of Oxygen, Hydrogen, Nitrogen, Carbon, Iron, Mercury; Sulphuric acid, Carbonic Oxide, Ammonia, Cyanogen.
7. Name the Compounds of Oxygen with Nitrogen, and give their symbols.
8. Give examples of changes of form, color, and temperature, produced by Chemical action.
9. State the points of resemblance and distinction between Hydrogen and Carbonic oxide.
10. Explain the method of making phosphorus.
11. How is marsh gas obtained?
12. Describe coal gas—the process of manufacture—its impurities—the method of removing them, and the tests of purity.

## ARITHMETIC.

1. Reduce to its simplest form—

$$\frac{\frac{5}{6} + \frac{7}{12} \text{ of } 3\frac{1}{4} - (\frac{7}{8} \text{ of } \frac{3}{2} - \frac{1}{3})}{\frac{5}{14} - \frac{3}{7} \text{ of } \frac{1}{2}}$$

2. If  $7\frac{2}{3}$  yards of cloth are given for  $2\frac{2}{3}$  bushels of corn, how many bushels of corn must be given for  $19\frac{1}{2}$  yards of cloth?

3. Divide seven millions, sixteen thousand and one, *hundred-millionths*; by three millions fifty thousand and sixty.

4. What will it cost to carpet a room 16 ft. 6 in. by 35 ft. 9 in., the carpet being  $\frac{3}{4}$  of a yard wide and \$1.75 per yard?

5. Three men working nine hours a day take sixteen days to pave a road 315 yards long and 30 feet broad; how many days will it take four men, working the same number of hours per day, to pave a road 1575 yards long and 35 ft. 6 in. broad?

6. A, B and C together have \$1200—of which A has twice and B three times as much as C; what is the interest of each for 2 years and 6 months at 6 per cent.?

7. If a bookseller gained  $\frac{3}{8}$  of the cost of a book by selling it for \$5.50, what would he have gained per cent. by selling it for \$6.50?

8. A drover bought 20 horses, agreeing to pay \$1 for the 1st, \$2 for the 2d, \$4 for the 3d and so on; what did they cost him?

9. What is the value of a triangular lot of ground of which the sides are 118, 144 and 162 feet, respectively, at 45 cents a square foot?

10. Required the dimensions of a cubical tank that shall hold 18 tons of water, a cubic foot of water, weighing 1000 oz.?

## BOOK-KEEPING.

1. What are the fundamental principles of Book-Keeping by Double Entry?

2. What is the use of the Journal?

3. Give three rules for ascertaining the Debtor and Creditor in business transactions.

4. Journalize the following:

Jan. 20th, 1871. Sold John Jones 450 lbs. of tea @ \$1.10.

Received in payment 20 bbls. of flour @ \$9.50. Cash \$100.00

His note in my favor at 30 days for balance.

5. Journalize the following:

January 20th, 1871. Bought of Wm. Wilson 3250 lbs. of Sugar @ 12 cents.

Gave in part payment John Jones' note in my favor, less discount at 6 per cent. The balance is on account.

6. Write a Day Book Entry which would justify the following Journal Entry:

Cash, Dr.....\$989 50

Discount, Dr.....10 50

To Bills Receivable, \$1000.

7. If the Cr. side of the following accounts were greater than the Dr. side, what would be your inference in each case: Cash, Bills Receivable, Profit and Loss, Stock?

8. Write a copy of the following papers, filling up the dates at discretion:

(a) Your receipt for \$125.50, paid by Samuel Turner on account.

(b) A promissory note for \$375.25 @ 90 days, which you have received from Robert Moore, endorsed by George Gill, in payment of goods purchased by him (Moore.)

(c) Your draft on John Jackson, of New York, @ 30 days, for \$397.40, in favor of Wm. Smith.

(d) A draft by George Brown, of Philadelphia, on you, @ 10 days' sight, for \$750.28, in favor of James Johnston, which you have accepted.

9. Journalize (a), (b), (c), (d).

10. State how you would close the following accounts, and in what order: Mdse., Stock, Expenses, Profit and Loss, Cash, Bills Pay.

## ALGEBRA.

$$1. (a^{\frac{3n}{2}} - a^{-\frac{3n}{2}}) (a^{\frac{n}{2}} - a^{-\frac{n}{2}}).$$

$$2. (\sqrt{a+b} - \sqrt{a-b}) (\sqrt{a+b} + \sqrt{a-b}).$$

$$3. \left( \frac{2x}{x+y} + \frac{y}{x-y} - \frac{y^2}{x^2-y^2} \right) \div \left( \frac{1}{x+y} + \frac{x}{x^2-y^2} \right).$$

$$4. (x-a)^{\frac{1}{2}} + (x-b)^{\frac{1}{2}} = (a-b)^{\frac{1}{2}}.$$

$$5. \frac{1}{x} + \frac{1}{y} = 1$$

$$\frac{1}{x} + \frac{1}{z} = 2$$

$$\frac{1}{y} + \frac{1}{z} = \frac{3}{2}.$$

$$6. 2 \left( x^{\frac{1}{u}} + x^{-\frac{1}{u}} \right) = 5.$$

$$7. (a^{\frac{1}{2}} + x^{\frac{1}{2}})^{\frac{1}{2}} = (a^{\frac{1}{2}} + x^{\frac{1}{2}})^{\frac{1}{2}}.$$

8. In how many ways may a party of eight arrange themselves at a round table?

$$9. \text{Expand } \frac{1}{(\sqrt[3]{a+x})^2}$$

10. If the numerator of a certain fraction is increased by one, its value becomes  $\frac{1}{3}$ . If the denominator is increased by one, its value becomes  $\frac{1}{4}$ . What is the fraction?

## GEOMETRY.

1. If two triangles have two angles and the included side of the one equal to two angles and the included side of the other, each to each, the two triangles will be equal in every respect.
2. Parallelograms on the same base and between the same parallels, are equal.
3. If any point be taken in the diagonal of a parallelogram, and through it lines be drawn parallel to the adjacent sides, the parallelograms through which the diagonal does not pass are equal.
4. Every line drawn through the intersection of the diagonals of a parallelogram bisects the parallelogram.
5. The area of a trapezoid is equal to the altitude multiplied by one-half the sum of the parallel sides.
6. The square of the hypotenuse of a right-angle triangle is equal to the sum of the squares described on the other two sides.
7. If a perpendicular be drawn from the right angle of a right-angled triangle to the hypotenuse, the triangles on each side of the perpendicular will be similar to the whole triangle and to each other.
8. An angle at the centre of a circle is double an angle at the circumference standing on the same arc.

## THEORY OF TEACHING.

1. Give the division of the Mental Powers.
2. Give the order in which they are developed.
3. Name and explain the Laws of Association.
4. What are the advantages and disadvantages of a strong verbal memory?
5. Show the importance of beginning right.

MARYLAND  
STATE NORMAL SCHOOL,

N. E. CORNER CHARLES AND FRANKLIN STS.

---

HE MARYLAND STATE NORMAL SCHOOL, established by the School Law of 1865, and reorganized under the Law of 1868, is intended for the "instruction and practice of Teachers in the science of education, the art of teaching and the mode of governing schools."

ADMISSION.

Each county is entitled to send two students for each of its representatives in the General Assembly.

The apportionment is as follows:

Allegany county, 12; Anne Arundel county, 8; Baltimore county, 14; Baltimore city, 42; Calvert county, 6; Caroline, 6; Carroll, 10; Cecil, 10; Charles, 6; Dorchester, 8; Frederick, 14; Harford, 10; Howard, 6; Kent, 6; Montgomery, 8; Prince George's, 8; Queen Anne's, 6; Saint Mary's, 6; Somerset, 6; Talbot, 6; Washington, 12; Wicomico, 6; Worcester 6.

Persons desiring to enter the school should make application to the Board of School Commissioners of their re-

spective counties. The Law requires the appointees to be not less than sixteen years of age, if young women, and not less than seventeen if young men. They should have a good elementary education, and must "file a written declaration that their object in obtaining admission is to qualify themselves as Public School Teachers, and that it is their intention to engage in the profession of teaching within the State."

When the legal quota from any county is filled, applicants from that county should address the Principal, enclosing a letter of recommendation from the County Board of School Commissioners.

## REQUIREMENTS FOR ADMISSION.

### JUNIOR CLASS.

SPELLING.—To write correctly from dictation three verses selected from the New Testament.

READING.—To read accurately and intelligibly in the newspapers.

WRITING.—A legible and moderately rapid hand.

ARITHMETIC.—Correct and rapid addition. Written Arithmetic to the end of Vulgar Fractions.

GRAMMAR.—Definitions. Etymological Forms. Parsing of easy sentences.

### MIDDLE CLASS.

SPELLING.—Creery's G. S. Speller to page 144.

READING.—Newell & Creery's Fifth Reader with Rules of Elocution.

WRITING.—Analysis of Letters; neat and rapid Writing.

ARITHMETIC.—To the end of Decimal Fractions—Mental and Written.

GRAMMAR.—Parsing of selections from the Fifth Reader.

ALGEBRA.—To the end of Fractions in Hackley's or Robinson's University Algebra.

GEOGRAPHY.—To draw from memory and describe the maps of Maryland, North America, South America and the United States.

\*LATIN.—Allen's Latin Grammar.

\*HISTORY AND CHRONOLOGY.—The principal events of the 18th and 19th Centuries.

#### SENIOR CLASS.

(In addition to the studies of Middle Class.)

SPELLING AND ETYMOLOGY.—Creery's G. S. Speller to the end.

READING.—Newell's & Creery's Sixth Reader with Rules of Elocution.

ARITHMETIC.—Brooks's Mental and Written to the end.

GRAMMAR.—Analysis of sentences and difficult parsing.

ALGEBRA.—To the end of Quadratic equations.

GEOGRAPHY.—To draw from memory and describe the maps of Europe, Asia, Africa, British Isles and France.

HISTORY AND CHRONOLOGY.—The principal events of the 16th and 17th Centuries.

\*LATIN.—Allen's Latin Lessons.

#### SESSIONS.

The School year of nine months is divided into three sessions. The Fall Session commences on the first Tuesday in September. The Winter Session commences on the first Monday in December. The Spring Session begins on the first Monday in March, and closes on the last Friday in May.

Students will be admitted to entrance in the first week of each session, and not at any other time, unless previous arrangements have been made with the Principal to that effect.

---

\*Not required from new students.

Exception will be made in favor of persons engaged in teaching, who will be received at the close of any of their regular School terms, previous to the first of March.

#### **EXPENSES.**

Students appointed by the County Boards, or by the Baltimore City Board are under no expense for tuition, books, and school stationery.

In addition to the regular appointees, a limited number of students will be received of the proper age and scholastic acquirements, who shall pay twenty-five dollars per session for tuition, and purchase their own text books.

Such students will not be required to file the declaration referred to above.

#### **BOARDING.**

Boarding can be obtained in the city at prices varying from \$4 to \$7 a week. The boarding houses selected by students must be approved by the Principal before the students are admitted.

Mrs. Borgman, Principal of the Girl's Model School, will receive a limited number of young ladies as boarders at the rate of sixty-six dollars per session of three months, payable in advance. Her residence is No. 42 Mulberry street, within three minutes walk of the Normal School.

#### **COURSE OF INSTRUCTION.**

The course embraces all the studies required by the school law to be taught in the Public Schools of the State, namely: Orthography, Reading, Writing, English Grammar, Geography, History, Algebra, Book-Keeping, Physiology, Natural Philosophy, Vocal Music and Drawing. To these are added English Literature, Latin, Mental and Moral Philosophy, Geometry and Trigonometry, Chemistry, Botany, and Zoology. Provision has also been made for thorough instruction, at a small additional expense, in French, German, Painting and Instrumental Music.

Inquiries are often made regarding the length of time required to complete the course. It is impossible to give a definite answer to this question. The examination for diplomas is open to all students in good standing who have been at the School for three sessions. Experience shows that while some students have graduated in one year, the majority require two years, and many three years.

The main object of the School not being to afford a liberal education to the citizens, but to give professional training to those who intend to become teachers, all the departments of study are considered but as means to this end. The diploma of the School is not given on account of regular attendance merely, nor even of high attainments, but on the ground of a fairly developed capacity for teaching and governing, in addition to the requisite amount of scholarship. For this reason every student who proposes to graduate is required to make the theory and practice of teaching the subject of special study for at least half a session. The Model School offers great facilities for obtaining the necessary practice in the art of teaching; and all graduates are required to spend one term as teachers in this School under proper superintendence.

8. How does the spectrum of an incandescent solid differ from that of a glowing gas?
9. Give in detail your reason for believing that iron exists in the solar atmosphere.
10. If a hundred cubic inches of oxygen weigh 34.3 grains, how many gallons of oxygen can be obtained from 1 lb. avoirdupois, of potassium chlorate?
11. Explain Dalton's theory of atoms.
12. What reactions take place when the vapor of water is passed over red hot iron; describe the experiment and what may be learned from it.
13. Explain the divisions of the elements into Monads, Dyads, &c.
14. Write and explain the equation which represents the action of sulphuric acid on rock salt and binoxide of manganese.
15. Give the combining weights and symbols of oxygen, hydrogen, nitrogen, chlorine, sulphur and potassium.
16. How is a thermometer made and graduated?
17. What is meant by latent heat? illustrate it by water and steam.

## ARITHMETIC.

1. Simplify  $(\frac{2}{3} \text{ of } \frac{4}{5}) \div (\frac{31}{3} \div \frac{5}{2})$   
 $(\frac{4}{9} \div \frac{5}{7\frac{1}{2}}) - (\frac{1}{1\frac{1}{4}} \text{ of } 3\frac{1}{2})$
2. Divide the difference between one thousandth and one ten thousandth, by the product of three hundredths by three hundred-thousandths.
3. If a druggist buy \$50 worth of opium at \$5.75 per lb. avoirdupois, and sell it at \$6 25 per lb. troy, how much does he gain or lose?
4. Which is the better investment, stocks at  $12\frac{1}{2}$  per cent. discount bearing interest at  $4\frac{3}{4}$  per cent., or stocks at  $12\frac{1}{2}$  per cent. premium, bearing interest at  $5\frac{1}{4}$  per cent.; and what would be the annual gain of interest from investing \$70,000 in the cheaper stock?

5. What is the true present worth of a note for \$2,000 due 2 yrs. 8 months hence, money being worth 6 per cent?

6. The bank discount on a note which has 94 days to run is \$5.72. What is the face of the note?

7. How much must be paid in Baltimore for a draft on London for £750. Exchange  $\$1.10\frac{7}{8}$  and gold  $\$1.12\frac{1}{2}$ ?

8. Required the depth of a cylindrical cistern which will hold 18,000 gallons of water, the diameter being 2-5 of the depth.

## BOOK-KEEPING.

1. What is the fundamental difference between double and single entry?

2. Name all the circumstances under which a person may become Dr. or Cr.

3. What is shown by the Dr. and the Cr. side, and by the balance of the following accounts: Cash, Merchandise, Profit and Loss and Stock?

4. Make a detailed statement of the object and method of closing ledger accounts.

5. Prove mathematically that the balance sheet must close of itself.

6. Journalize the following:

(a) Commenced business this day with

Cash in Bank.....	\$6,000 00
Merchandise.....	2,000 00
J. Smith owes me on account.....	350 00
Wm. Brown owes me on his note..	500 00

I owe as follows:

J. Jones on account.....	275 00
Wm. Black on my promissory note..	670 00

(b) Bought Mdse. of Robert Williams, amounting to \$1,000; gave in payment Wm. Brown's note, as above. Discount allowed for 94 days at 6 per cent. My note for the balance.

7. Write the correct forms for the following :

- (a) A receipt which I take in full.
- (b) A receipt which I give in part payment.
- (c) A promissory note which I make.
- (d) A promissory note in my favor made by another.
- (e) A draft which I make.
- (f) A draft which I accept.

### ALGEBRA.

1. Find the G. C. D. of  $(y^4 - a^2y^2 - a^4)$  &  $(y^4 + ay^2 - a^2y - a^4)$

2. Simplify  $\left\{ \frac{(a^m)^{\frac{1}{r}} (a^n)^{\frac{1}{n}}}{1 - b^n (1 - b)^r} \right\}^{nr} \div \left\{ \left( \frac{a}{b} \right)^q \right\}^r$

3. Remove negative exponents in  $a^{-\frac{1}{2}} b^2 c^{m-n}$   
 $a^2 b^{-\frac{1}{2}} c^{n-m}$

4. Find the value of  $\frac{x-a}{b} - \frac{x-b}{a}$ , when  $x = \frac{a^2}{a-b}$

5. Given  $\frac{1}{1-x} - \frac{1}{1-x^2} = \frac{3}{2} \sqrt{\frac{x}{x+1-x^2}}$ ; find the values

of x and y.

6. Given  $(a-c)x - by = bc$ ;  $x + y = a + b$ ; find the values of x and y.

7. Given  $(x+y) \frac{x}{y} = 24$ ;  $(x-y) \frac{y}{x} = 6$ ; find the values of x and y.

8. Given  $x^2 - y^2 : (x-y)^2 :: 61 : 1$ ;  $xy = 20$ ; find the values of x and y.

9. Find an equation whose roots shall be

$$\frac{1 - \sqrt{mn}}{1 - m - 1 - n} \quad \text{and} \quad \frac{1 - \sqrt{mn}}{1 - m - 1 - n}$$

10. If a certain rectangular field were 10 ft. longer and 5 ft. broader, it would contain 400 square feet more; but if it were 5 feet longer and 10 ft. broader, it would contain 450 sq. ft. more; required its length and breadth.

## GEOMETRY.

1. If three sides of one triangle are equal to three sides of another, each to each, the triangles shall be equal in every respect.

2. The sum of the interior angles of a triangle is equal to two right angles.

3. The square described on the difference of two lines is equal to the sum of the squares of the lines diminished by twice the rectangle contained by the lines.

4. The sum of the squares of the diagonals of a parallelogram is equal to the sum of the squares of the sides.

5. From a given point without a circle to draw a tangent to the circle.

6. A line drawn parallel to one side of a triangle cuts the other sides proportionally.

7. If the vertical angle of a triangle be bisected, the segments of the base shall be to each other as the other sides of the triangle.

If two triangles have an angle in each equal, they will be to each other as the rectangles of the sides containing the equal angles.

## PHYSIOLOGY.

Write brief notes on the following topics and heads :

1. **TEETH**—Formation, composition ; different sets and appearances of each ; division of each set ; differences of the divisions ; how best preserved.

2. **ORGANS OF MASTICATION**—Names and uses ; function of saliva and how produced ; how stimulated ; its effects on boiled starch.

3. **STOMACH**—Situation and form, size when empty and distended ; description and uses of its different coats ; secretion and use of gastric juice digestion, how performed ; conditions requisite for healthy digestion.

4. **LIVER**—Situation and description ; double office performed by it ; situation and office of the portal vein ; formation of the bile, where deposited ; time of its greatest discharge into the intestine ; its ultimate decomposition.

5. **ABSORPTION**—Extraction of chyle from chyme; appearance of chyle when leaving the intestine; lacteal system; absorption of fat.

6. **HEART**.—Description; situation; course of the blood through it; divisions of the Aorta; movements of the blood through the arteries and veins; action of the valves; difference between an artery and a vein; circulation of the blood through the body.

7. **RESPIRATION**—Situation and structure of the lungs; changes in the blood, proportion of carbon and oxygen in arterial and venous blood, origin of carbonic acid in the blood; inspiration and expiration; movements of the diaphragm and ribs in respiration; necessity of ventilation.

8. **ANIMAL HEAT**—Standard temperature of animals; mode of generation of animal heat; theory of combustion; objection to this theory.

# MARYLAND

## STATE NORMAL SCHOOL,

N. E. CORNER CHARLES AND FRANKLIN STS.

---

THE MARYLAND STATE NORMAL SCHOOL, established by the School Law of 1865, and reorganized under the Law of 1868, is intended for the "instruction and practice of Teachers in the science of education, the art of teaching and the mode of governing schools."

### ADMISSION.

Each county is entitled to send two students for each of its representatives in the General Assembly.

The apportionment is as follows :

Allegany county, 12; Anne Arundel county, 8; Baltimore county, 14; Baltimore city, 42; Calvert county, 6; Caroline, 6; Carroll, 10; Cecil, 10; Charles, 6; Dorchester, 8; Frederick, 14; Harford, 10; Howard, 6; Kent, 6; Montgomery, 8; Prince George's 8; Queen Anne's, 6; Saint Mary's, 6; Somerset, 6; Talbot, 6; Washington, 12; Wicomico, 6; Worcester 6.

Persons desiring to enter the school should make application to the Board of School Commissioners of their respective counties. The Law requires the appointees to be not less than sixteen years of age if young women, and not less than seventeen if young men. They should have a good elementary education, and must "file a written declaration that their object in obtaining admission is to qualify themselves as Public School Teachers, and that it is their intention to engage in the profession of teaching within the State."

When the legal quota from any county is filled, applicants from that county should address the Principal, enclosing a letter of recommendation from the County Board of School Commissioners.

## REQUIREMENTS FOR ADMISSION.

## SESSIONS.

The School year of nine months is divided into three sessions. The Fall Session commences on the first Tuesday in September. The Winter Session commences on the first Monday in December. The Spring Session begins on the first Monday in March, and closes on the last Friday in May.

Students will be admitted to entrance in the first week of each session, and not at any other time, unless previous arrangements have been made with the Principal to that effect.

Exception will be made in favor of persons engaged in teaching, who will be received at the close of any of their regular School terms, previous to the first of March.

## EXPENSES.

Students appointed by the County School Boards, or by the Baltimore City Board are under no expense for tuition, books, and school stationery.

In addition to the regular appointees, a limited number of students will be received of the proper age and scholastic acquirements, who shall pay twenty-five dollars per session for tuition, and purchase their own text books. Such students will not be required to file the declaration referred to above.

## BOARDING.

Boarding can be obtained in the city at prices varying from \$4 to \$7 a week. The boarding houses selected by students must be approved by the Principal before the students are admitted.

Mrs. Borgman, Principal of the Girl's Model School, will receive a limited number of young ladies as boarders at the rate of sixty-six dollars per session of three months, payable in advance. Her residence is No. 42 Mulberry street, within three minutes walk of the Normal School.

## COURSE OF INSTRUCTION.

The course embraces all the studies required by the school law to be taught in the Public Schools of the State, namely: Orthography, Reading, Writing, English Grammar, Geography, History, Algebra, Book-Keeping, Physiology, Natural Philosophy, Vocal

Music and Drawing. To these are added English Literature, Latin, Mental and Moral Philosophy, Geometry and Trigonometry, Chemistry, Botany, and Zoology. Provision has also been made for thorough instruction, at the expense of the students, but much below the ordinary rates, in French, German, Painting, Instrumental Music and Telegraphy.

Inquiries are often made regarding the length of time required to complete the course. It is impossible to give a definite answer to this question. The examination for diplomas is open to all students in good standing who have been at the School for three sessions. Experience shows that while some students have graduated in one year, the majority require two years, and many three years.

The main object of the School not being to afford a liberal education to the citizens, but to give professional training to those who intend to become teachers, all the departments of study are considered but as means to this end. The diploma of the School is not given on account of regular attendance merely, nor even of high attainments, but on the ground of a fairly developed capacity for teaching and governing, in addition to the requisite amount of scholarship.

## ETYMOLOGY.

Filial obedience is the first and greatest requisite of a State; by this we become good subjects, capable of behaving with just subordination to our superiors, and grateful dependents on heaven; by this we become good magistrates; for early submission is the truest lesson to those who would learn to rule. By this the whole State may be said to resemble one family.

I. Write the words derived directly from the Latin; explain the root, prefix and suffix of each and develop the meaning of the word in connection with its etymology.

II. Give the words derived from the Latin through the French.

III. Divide the remaining words into four classes; *a.* simple uninflected; *b.* simple inflected; *c.* derivative; *d.* compound.

IV. Write the paragraph, changing as far as possible all words of Latin origin into corresponding Saxon words.

V. Change as far as possible the Saxon words into equivalent words of Latin origin.

### PARSING.

Parse all the words in the following sentence :

If to do were as easy as to know what were good to do, chapels had been churches, and poor men's cottages, princes' palaces.

### ANALYSIS.

The brave man is not he who feels no fear,  
For that were stupid and irrational,  
But he whose noble soul its fear subdues,  
And bravely dares the danger nature shrinks from.  
As for your youth whom blood and blows delight,  
Away with them ! there is not in their crew  
One valiant spirit.

### HISTORY.

Write brief notes on the following subjects ; give dates in all cases :

Agincourt, John Huss, Treaty of Troyes, Siege of Orleans, War of the Roses, Louis XI., Richard III., The Alhambra, Establishment of the Swiss Republic, Flodden Field, Martin Luther, Henry VIII., Elizabeth, Shakespeare, Massacre of St. Bartholomew's Day, First Telegraph Line in the United States, Pacific Railroad, Mount Cenis Tunnel, Franco-Prussian War.

### GEOGRAPHY.

1. Give the dimensions and shape of the earth and its distance from the sun.
2. Describe the daily motion of the earth.
3. Explain the annual motion of the earth, and the difference between the tropical and the sidereal year.
4. Describe the other motions of the earth.
5. Describe the inclination of the axis of the earth and the results therefrom.
6. Explain the equinox and solstice. When are days and nights equal, and why ? When are the days longer than the nights, and why ?

7. Explain the precession of the equinoxes.
8. Explain the cause of the trade winds.
9. Describe the Gulf Stream, and state the causes.
10. Give the route by water from St. Petersburg to Odessa.
11. Name the counties and county towns on the Western Shore of Maryland.
12. Name in order the cities of the United States, having a population of over 200,000.

### CHEMISTRY.

1. Name the most important non-metallic elements, and give their symbols and combining weights.
2. Explain the difference between an atom and a molecule.
3. Give examples of monads, dyads, triads and tetrads.
4. Distinguish between a chemical compound and a mere mixture, and give examples.
5. Give the chemical names and symbols of nitre, copperas, blue-vitriol, chalk, gypsum, corrosive sublimate.
6. How is the chemical composition of air demonstrated?
7. Describe and distinguish the following gases: oxygen, hydrogen, nitrogen, carbonic acid, carbonic oxide.
8. How is chlorine prepared; give its properties.
9. How many grams of oxygen are there in 960 grams of potassium chlorate?
10. Describe the action of sulphuric acid upon sodium nitrate.
11. What are the tests for hard water, common salt, hydrochloric acid, iodine.
12. Give the symbol and graphic representation of bi-chromate of potash.
13. Explain the equation  $2\text{H}_2\text{O} + \text{K}_2 = 2\text{HKO} + \text{H}_2$ .
14. Explain Endosmose and Exosmose, and give an example.
15. Name the different varieties of sugar.
16. What is the action of yeast on sugar?
17. What are the most important constituents of corn?
18. What are the conditions of fermentation?
19. Explain the chemical changes which take place in making bread.
20. Describe some of the principal methods of cooking meat, and explain the chemical changes that take place.

## ARITHMETIC.

1. For two successive years a merchant annually contributed \$100 for charitable purposes, and added yearly to that part of his capital not thus expended a sum equal to its one-half, and at the end of the second year his capital was doubled. Required his original capital?

2. I engaged A to build the walls of a cellar  $29\frac{1}{4}$  feet long, 20 feet 3 inches wide,  $10\frac{1}{2}$  feet deep, each wall being  $3\frac{1}{2}$  feet thick, at 4 cents per cubic foot, making no allowance for corners, and I pay him in wood at \$8.884 per cord. How many cords does he receive for the job?

3. A vessel sailing on the equator finds the difference in time between two observations to be 1 hour, 28 minutes slow. In which direction is the vessel sailing, and what is the number of English miles which it has passed over during the time?

4. A man traveling goes 2 miles the first day, 4 miles the second, 8 miles the third, and so on for 10 days. How far does he travel the last day? Give the formula.

5. How must I mark silk which cost me \$4 per yard, so that I may fall 20 per cent. from the marked price, and yet make 25 per cent. of the cost?

6. A man buys a house for \$4,000 on 6 months credit. After keeping it 3 months, he sold it for \$4,500, and took a note payable in 9 months, which he discounted at a bank to meet his own note when it became due. What did he gain by the transaction?

7. A hunter standing 39 paces of 3 feet each from a pole 6 feet in diameter, shot a hawk from its top. How far did the ball move to reach the hawk, provided it started five feet above the ground?

8. What is the difference in the expense of fencing a square 10 acre lot, and a 10 acre lot whose length is to its width as 4 : 1, the fencing costing \$3.50 a rod.

9. How many cannon balls 12 inches in diameter can be put into a cubical vessel 5 feet on a side, and how many gallons of wine will it hold after being filled with the balls, allowing the balls to be hollow, the interior being 6 inches in diameter, and the opening leading to it containing one solid inch?

10. A cask 30 inches long, and 18 inches at the bung diameter contains a certain number of gallons. What must be the dimensions of a similar cask that contains 8 times as much?

# BOOK KEEPING.

1. Name and describe the three principal books used in Book Keeping.

2. Name some auxiliary books and state the purposes for which they are used.

3. Into what classes may all business transactions be resolved. Give the rule for each class?

4. Give an example with proper Day-Book and Journal entry of the following :

(a) Selling for cash.

(b) Buying for cash.

(c) Selling on note.

(d) Buying on note.

(e) Selling on credit.

(f) Buying on credit.

5. When is Stock, Profit and Loss, Discount, Bills Payable, each Dr. ; when Cr?

6. Into what classes may all Ledger accounts be divided? Give an example of each.

7. Journalize the following :

8. Journalize the following :

The Chesapeake Bank has discounted this day, April 23, 1873, Thomas Smith's note for \$8,072.75 dated April 1st, 1873, for 60 days, payable to my order.

9. Explain the method of closing the Ledger accounts.

10. What does the Dr. side of Stock, Cash, Bills Payable, Discount, Profit and Loss, in the Ledger show?

## ALGEBRA.

1. An engraving whose length was twice its breadth was mounted on Bristol board, so as to have a margin 3 inches wide and equal in area to the engraving, lacking 36 inches. Find the width of the engraving.

2. Extract the square root of

$$1 - 2a + 3a^2 - 4a^3 + 3a^4 - 2a^5 + a^6.$$

3. Reduce to its simplest form  $(x - y) \sqrt{2x^3 - 4^2xy + 2xy^2}$ .

4. Find the sum of

$$\sqrt{(1+a)^{-1}} + \sqrt{a^2(1+a)^{-1}} + a\sqrt{(1+a)(1-a)^{-2}}.$$

$$5. \frac{a}{b} \sqrt{\frac{x}{y}} \times \frac{y}{x} \sqrt[3]{\frac{b^2}{a^2}} + \sqrt[3]{\frac{bx^2}{ay^2}}$$

$$6. \text{ Given } \frac{\sqrt{x} + \sqrt{x-a}}{\sqrt{x} - \sqrt{x-a}} = \frac{n^2a}{x-a}$$

$$7. \begin{aligned} cx + y + az &= 2a \\ c^2x + y + a^2z &= 2ac \\ acx - y + acz &= a^2 + c^2 \end{aligned}$$

$$8. \begin{aligned} x + \sqrt{xy} + y &= 19 \\ x^2 + xy + y^2 &= 133 \end{aligned}$$

9. A grocer sold 50 lbs. of tea at an advance of 10 per cent. on the cost, and 30 lbs. of coffee at an advance of 20 per cent. on the cost, and received for the whole \$27.40, gaining \$2.90. What was the cost per pound of the tea and the coffee?

10. Four places are situated in the order of the letters A, B, C, D. The distance from A to D is 34 miles. The distance from A to B is to the distance from C to D as 2 : 3; and  $\frac{1}{4}$  of the distance from A to B, added to  $\frac{1}{2}$  the distance from C to D, is 3 times the distance from B to C. What are the respective distances?

11. There is a stack of hay whose length is to its breadth as 5 to 4, and whose height is to its breadth as 7 to 8; it is worth as many cents per cubic foot as it is feet in breadth, and the whole is worth at that rate 224 times as many cents as there are square feet on the bottom; required the dimensions of the stack.

## GEOMETRY.

Demonstrate the following theorem and all the theorems directly involved in the demonstration :

If a straight line be divided into two equal parts and also into two unequal parts, the sum of the squares of the unequal parts shall be equal to twice the square of half the line and twice the square of the line between the points of section.

## PHYSIOLOGY.

1. Construct a chart showing the classification of the organs of the body.

2. Explain the construction of the spinal column, the benefits derived from this construction, and its importance to the whole system.

3. What is a muscle, what effect has exercise upon the muscles and when is that exercise injudicious ?

4. Describe the aponeurosis and state the advantages and disadvantages of its inflexibility.

5. Describe the structure of the lungs and tell the changes which are effected in them during respiration.

6. Locate the Cerebrum and Medulla Oblongata. What is the function of each, and tell the effect produced by long continued mental exercise.

7. Describe the general arrangement of the sympathetic system.

8. What injurious effects are liable to be produced upon the internal organs by exposure to wet or cold ?

9. Explain the functions of the different parts of the ear, and show why a common cold in the head is often accompanied by deafness.

10. Explain why a sudden blow upon the eyelids produces the appearance of sparks.

11. What are the requisites for healthy digestion ?

12. Give the remedies for the following poisons : Oxalic acid, arsenic, antimonial wine, acetate of lead, phosphorus, laudanum, the virus of rabid animals, poisonous gases.

## NATURAL PHILOSOPHY.

Write brief notes on :

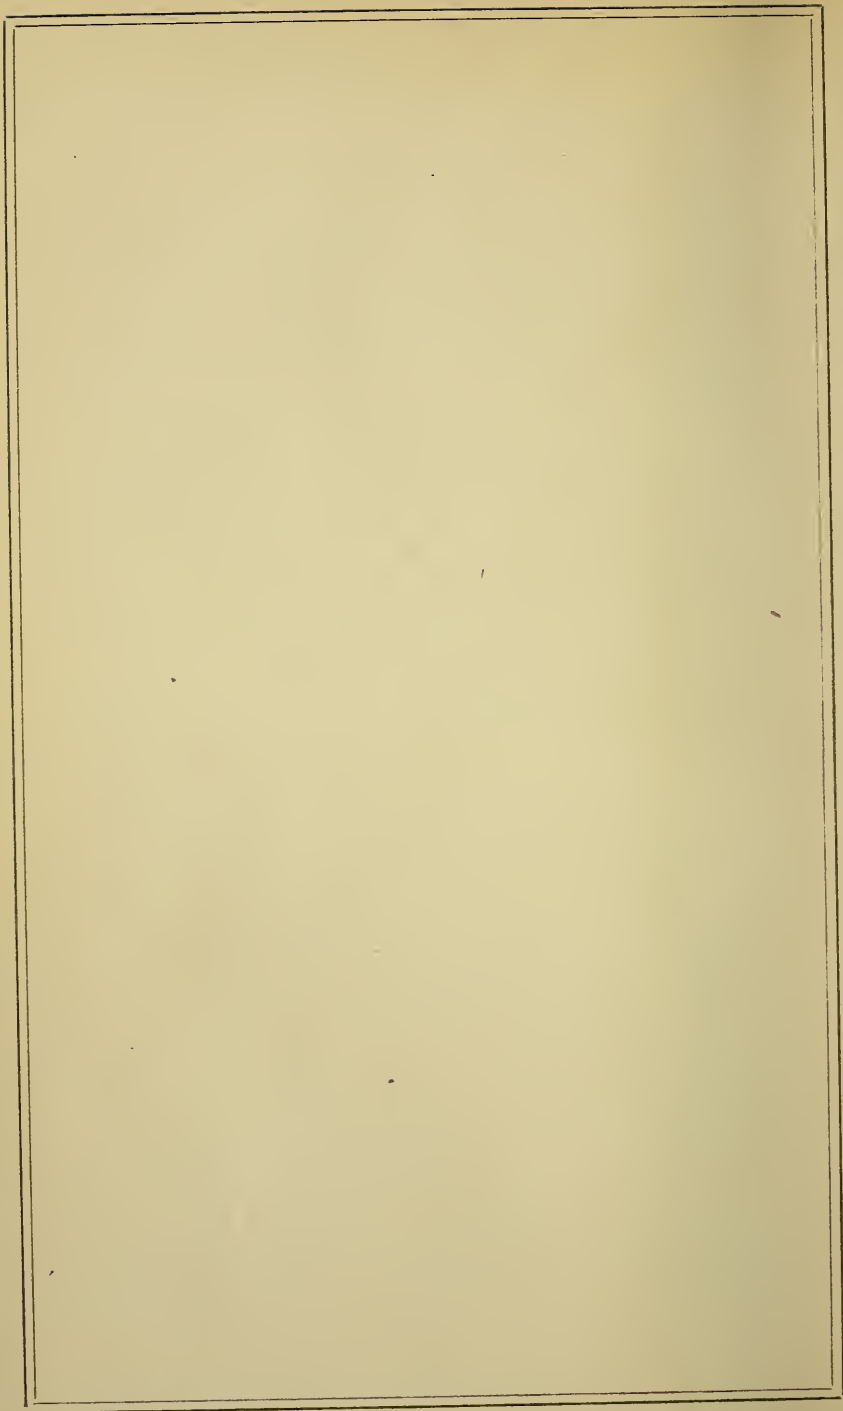

1. The law of falling bodies, with illustrations.
2. The law of the composition of forces, with illustrations.
3. The law of incidence and reflection.
4. The law of inverse squares.
5. The relation between power, resistance, and the length of the arms of a lever.
6. The air pump.
7. The electrical machine and Leyden Jar.
8. The Barometer
9. The Thermometer.
10. Grove's Battery.

## DRAWING.

1. What is Perspective?
  2. What lines and points are necessary to make a perspective construction?
  3. What is the line of horizon?
  4. What is the base line?
  5. How do you find your points for measuring distances?
  6. From what part of your prepared lines do you find any measure you need?
  7. How do you measure heights?
  8. What are the station points, and what is the line of direction?
  9. What is the rule about placing the point of sight, and under what circumstances is a deviation advisable?
  10. Construct a house, your eye resting at the corner 6 feet from the base line. The house 24 feet front, 18 feet high, front door 8 feet high, 4 wide, 2 feet space above the door, windows 6 feet high, 3 feet wide, 2 feet space up to the roof, width of the house equally divided between the windows and intervening spaces.
- Draw a cross on a pedestal—the pedestal 6 feet square, the trunk of the cross rising from the centre 2 feet square, 6 feet high, crossed by an arm 2 feet square and headed by a block 2 feet square.

## THEORY OF TEACHING.

1. What should be the great aim of a teacher?
2. Name in the order of their importance the essential qualifications of a teacher.
3. When do you consider a recitation perfect?
4. What are the right uses and the wrong uses of text-books?
5. State the arguments for and against the use of corporal punishment.
6. Write brief notes on the use and abuse of rewards.
7. Write brief notes on the difference between emulation and rivalry as a motive power.
8. Write brief notes on the use and abuse of oral instruction.
9. Write brief notes on the duty of teachers to children in the district and not on the school register.
10. Give a sketch of an object lesson on sugar to a class of children eight years old.

# MARYLAND STATE NORMAL SCHOOL,

N. E. CORNER CHARLES AND FRANKLIN STS.

---

THE MARYLAND STATE NORMAL SCHOOL, established by the School Law of 1865, and reorganized under the Law of 1868, is intended for the "instruction and practice of Teachers in the science of education, the art of teaching and the mode of governing schools."

## ADMISSION.

Each county is entitled to send two students for each of its representatives in the General Assembly.

The apportionment is as follows:

Allegany county, 10; Anne Arundel county, 8; Baltimore county, 14; Baltimore city, 42; Calvert county, 6; Caroline, 6; Carroll, 10; Cecil, 10; Charles, 6; Dorchester, 8; Frederick, 14; Garrett, 6; Harford, 10; Howard, 6; Kent, 6; Montgomery, 8; Prince George's, 8; Queen Anne's, 6; St. Mary's, 6; Somerset, 6; Talbot, 6; Washington, 12; Wicomico, 6; Worcester, 6.

Persons desiring to enter the school should make application to the Board of School Commissioners of their respective counties. The Law requires the appointees to be not less than sixteen years of age if young women, and not less than seventeen if young men. They should have a good elementary education, and must "file a written declaration that their object in obtaining admission is to qualify themselves as Public School Teachers, and that it is their intention to engage in the profession of teaching within the State."

When the legal quota from any county is filled, applicants from that county should address the Principal, enclosing a letter of recommendation from the County Board of School Commissioners.

## REQUIREMENTS FOR ADMISSION.

### JUNIOR CLASS.

**SPELLING.**—To write correctly from dictation three verses selected from the New Testament.

**READING.**—To read accurately and intelligibly.

HISTORY AND CHRONOLOGY.—The principal events of the 16th and 17th Centuries.

\*LATIN.—Allen's Latin Lessons.

SESSIONS.

The School year of nine months is divided into three sessions. The Fall Session commences on the second Tuesday in September. The Winter Session commences on the second Tuesday in December. The Spring Session begins on the first Monday in March, and closes on the last Friday in May.

Students will be admitted to entrance in the first week of each session, and not at any other time, unless previous arrangements have been made with the Principal to that effect.

Exception will be made in favor of persons engaged in teaching, who will be received at the close of any of their regular School terms, previous to the first of March.

EXPENSES.

Students appointed by the County School Boards, or by the Baltimore City Board are under no expense for tuition, books and school stationery.

\*Not required from new students.

In addition to the regular appointees, a limited number of students will be received of the proper age and scholastic acquirements, who shall pay twenty-five dollars per session for tuition, and purchase their own text-books. Such students will not be required to file the declaration referred to above.

### BOARDING.

Boarding can be obtained in the city at prices varying from \$4 to \$7 a week. The boarding houses selected by students must be approved by the Principal before the students are admitted.

Mrs. Borgman, Principal of the Girls' Model School, will receive a limited number of young ladies as boarders at the rate of sixty-six dollars per session of three months, payable in advance. Her residence is No. 42 Mulberry street, within three minutes walk of the Normal School.

### COURSE OF INSTRUCTION.

The course embraces all the studies required by the school law to be taught in the Public Schools of the State, namely: Orthography, Reading, Writing, English Grammar, Geography, History, Algebra, Book-Keeping, Physiology, Natural Philosophy, Vocal Music and Drawing. To these are added English Literature, Latin, Mental and Moral Philosophy, Geometry and Trigonometry, Chemistry, Botany and Zoology. Provision has also been made for thorough instruction, at the expense of the students, but much below the ordinary rates, in French, German, Painting, Instrumental Music and Telegraphy.

Inquiries are often made regarding the length of time required to complete the course. It is impossible to give a definite answer to this question. The examination for diplomas is open to all students in good standing who have been at the School for three sessions. Experience shows that while some students have graduated in one year, the majority require two years, and many three years.

The main object of the School being to give professional training to those who intend to become teachers, all the departments of study are considered but as means to this end. The diploma of the School is not given on account of regular attendance merely, nor even of high attainments, but on the ground of a fairly developed capacity for teaching and governing, in addition to the requisite amount of scholarship.

4. By what means are moral principles developed and strengthened? Illustrate as regards Truth and Justice?
5. Are children naturally equal in intellect? How does this affect the teacher?
6. What are the usual characteristics of the beginnings of knowledge?
7. Give the classification of the Intellectual Powers.
8. State the principal laws of Association.
9. Give some rules to guide teachers in the use of the memory.
10. By what school studies may the Imagination be developed?
11. Explain and contrast Inductive and Deductive Reasoning?
12. What is the object of the Kindergarten?
13. State the advantages of Object Teaching?
14. State the advantages and disadvantages of direct questioning and topical recitation, respectively.

## GEOGRAPHY.

1. Define and describe the Equator, Ecliptic, and Tropical circles.
2. Define Isothermal lines. What large towns are on the same isothermal line as New York?
3. What is the typical structure of a continent?
4. Compare North and South America as regards physical structure.
5. Compare Europe with Africa in regard to size and extent of coast line.
6. Name the principal minerals of the United States. How are they distributed?
7. Name, in order, the cities of Europe having half a million inhabitants and over.
8. Give the termini of the Erie Railroad, and name the largest town upon it.

## HISTORY.

Write brief notes on the following topics:

1. Thermopylæ. 2. Cunaxa. 3. Joan D'Arc. 4. Bosworth Field. 5. Vasco di Gama. 6. Michael Angelo. 7. Sir Thomas More. 8. Cardinal Richelieu.

## ZOOLOGY.

1. Give the type and class of each of the objects [twenty specimens] before you.
2. Give in tabular form the four types of the Animal Kingdom, with the classes into which Agassiz divided them.
3. Give the reasons for and against a fifth type; describe the Foramenifera in reference to their shells.
4. Compare an Echinus, a Star-fish, and a Holothurian, and show that the plan of structure is the same in all.
5. Describe the coral reefs of Florida, and give Agassiz' computation in reference to the time it has taken to form them.
6. Write a sketch of an Object lesson on an Oyster; describe each part and its functions; particularly the formation of the shell and epidermis.
7. Describe a cuttle fish; to what class does it belong?
8. Give examples of three kinds of Decapods; examine and describe them in reference to the peculiarity of the posterior segment.
9. Give the three orders of worms, and describe them.
10. Name the three orders of Insectians, and compare them.
11. Name the sub-orders of insects; arrange them into two groups and give a short description of each group.

## BOTANY.

1. Give examples of Thallogens, Acrogens, Endogens and Exogens.
2. Describe each class, and tell how the plant is reproduced in the two lower ones.
3. Give the characteristics of the Ranunculaceæ with examples.
4. Describe the Liliaceæ; show why the Calla does not belong to this family.
5. Describe the Dentaria Laciniata.

## PHYSIOLOGY.

1. Name the inorganic substances found in our food; what would be the effect upon the system, if the food were entirely deprived of mineral substances?
2. What are the characteristics of the bones? Explain the effect of pressure upon the bones of a child.
3. Locate the Scapula; how is it fastened, and why?
4. Explain the formation of the joints.
5. Why is a moderate amount of exercise necessary?
6. Describe the position of the Stomach; what are the effects of over-eating, and the opposite?
7. Describe the circulation through the Liver; explain how a diseased liver affects the whole system.
8. Explain the reflex action of the Spinal Cord.
9. Locate the Cerebellum; describe its functions, and give illustrations.
10. What is the effect upon the system of breathing impure air? how are contagious diseases contracted?

## CHEMISTRY.

1. How is an Elementary distinguished from a compound substance?
2. Name twelve of the most common elements, giving their symbols and combining weights.
3. Name the gaseous and the liquid elements.
4. Explain Quantivalence.
5. Give the law of Equivalent Proportions.
6. Give the law of Avogadro.
7. Define a molecule and an atom.
8. How is the Gram derived? Give its equivalent in Troy grains, its multiples and subdivisions.
9. What is a Normal Salt?
10. Explain the terminations, Ide, Ite, Ate.
11. How do you explain the fact that a Pentad may become a Triad, that a Hexad may become a Tetrad? What are the limits of such changes?
12. Give the common names of Sodid Chloride, Argentic Nitrate, Calcic Carbonate and Cupric Sulphate.
13. Give the symbols and graphic notation of Hydroxyl, Carbonic Anhydride, Marsh gas, Potassic Sulphate.
14. Give the history, preparation and properties of Oxygen, Chlorine, Carbon, Phosphorus.
15. State and explain the action of Sulphuric Acid upon sugar.
16. Explain the Equation  $\text{MnO}_2 + 4 \text{HCl} = \text{MnCl}_2 + 2 \text{H}_2\text{O} + \text{Cl}_2$ .

## PHYSICS.

Write short notes upon the following topics :

The Pendulum. The Hydrostatic Press. The Centigrade Thermometer. The Barometer. The Magnetic Telegraph. The Correlation of Forces.

## ARITHMETIC.

1. A merchant paid \$8570.25 for a sixty days (60 da.) draft on New York. Exchange— $1\frac{1}{8}$  per cent. Premium. Interest—6 per cent. What is the face of the draft?

2. A merchant buys a bill of exchange on London for £250 10s. 6d. at \$4.87 per pound sterling. What does he pay in currency, gold being at \$1.13 $\frac{1}{2}$ .

3. I have 8 casks, each 30 inches long, and 18 inches at bung diameter. What should be the diameter of a similar cask, that would hold the contents of them all?

4. If a man saves \$80 a year for 20 years, investing it at compound interest at 6 per cent. how much will he be worth at the end of that time?

5. A field 80 rds. long has two parallel sides, 40 rds. and 28 rds. respectively. How many acres does it contain?

6. A father left his four sons, aged respectively 6, 7, 11, and 15 yrs., \$28,885, to be so divided that the respective parts on simple interest, at 6 per cent., shall amount to equal sums when they become twenty-one years of age. What is the share of each?

7. \$800.

Balto., March 10th, 1860.

For value received, on demand, I promise to pay W. H. Fisher, eight hundred dollars. Interest, 6 per cent.

The indorsements are:

Feb. 16, 1861, \$10; Oct. 20, 1861, \$75; Jan. 14, 1862, \$15; April 26, 1862, \$10.

What was due Sept. 1, 1862?

8. What must be the side of a square containing the same area as a circle 24 feet in diameter?

## ALGEBRA.

1. Convert  $\frac{1-x}{1-2x-3x^2}$  into an infinite series.

2.  $\frac{a+1}{a} + \frac{b+1}{b} - \frac{c+1}{c} - \frac{d+1}{d}$   
 $\frac{cd}{c+d} - \frac{ab}{a+b}$  Reduce to the simplest form.

3. Extract the square root of  $\frac{y^2}{x} + \frac{x^2}{4y} + \frac{2y^{\frac{3}{2}} - x^2}{(xy)^{\frac{1}{4}}}$

4. If  $t = \frac{2}{2-w}$ ,  $w = \frac{2}{2-z}$ ,  $z = \frac{2}{2-y}$ ,  $y = \frac{2}{2-x}$ , find the relation between  $t$  and  $x$

5. Given  $\begin{cases} a^2x + ay + az = a \\ ax + a^2y + az = a^2 \\ ax + ay + a^2z = a^3 \end{cases}$  find the values of  $x, y, z$ .

6. Given  $\frac{1}{a+b+x} = \frac{1}{a} + \frac{1}{b} + \frac{1}{x}$ ; find the value of  $x$ .

7. Given  $\begin{cases} x^2y + xy^2 = 30 \\ \frac{1}{x} + \frac{1}{y} = \frac{5}{6} \end{cases}$ ; find the values of  $x$  and  $y$ .

8. A farmer received \$24 for a certain quantity of wheat, and an equal sum at a price 25 cents less per bushel for a quantity of barley, which exceeded the quantity of wheat by 16 bushels. How many bushels were there of each?

9. A man has two square lots of unequal dimensions, containing together 25 A. 100 P. If the lots were contiguous to each other, it would require 280 rods of fence to embrace them in a single inclosure of six sides. Required the dimensions of the two lots.

10. There are three numbers in continued proportion. The product of the first and second is to the product of the second and third, as the first is to twice the second; and the sum of the first and third is 300. What are the numbers?

Journalize the above; open the proper Ledger accounts; close them; and  
make out the Balance Sheet.

## GEOMETRY.

1. If two angles of a triangle are equal, the sides opposite the equal angles are also equal.

2. If four sides of a quadrilateral are equal, the diagonals intersect at right angles.

3. One circle, and only one, can be described through three points not in the same straight line.

4. In a circle, the chord nearer the diameter is greater than the chord more remote.

5. If one angle of a right angled triangle be one-third a right angle, the side opposite is one-half the hypotenuse.

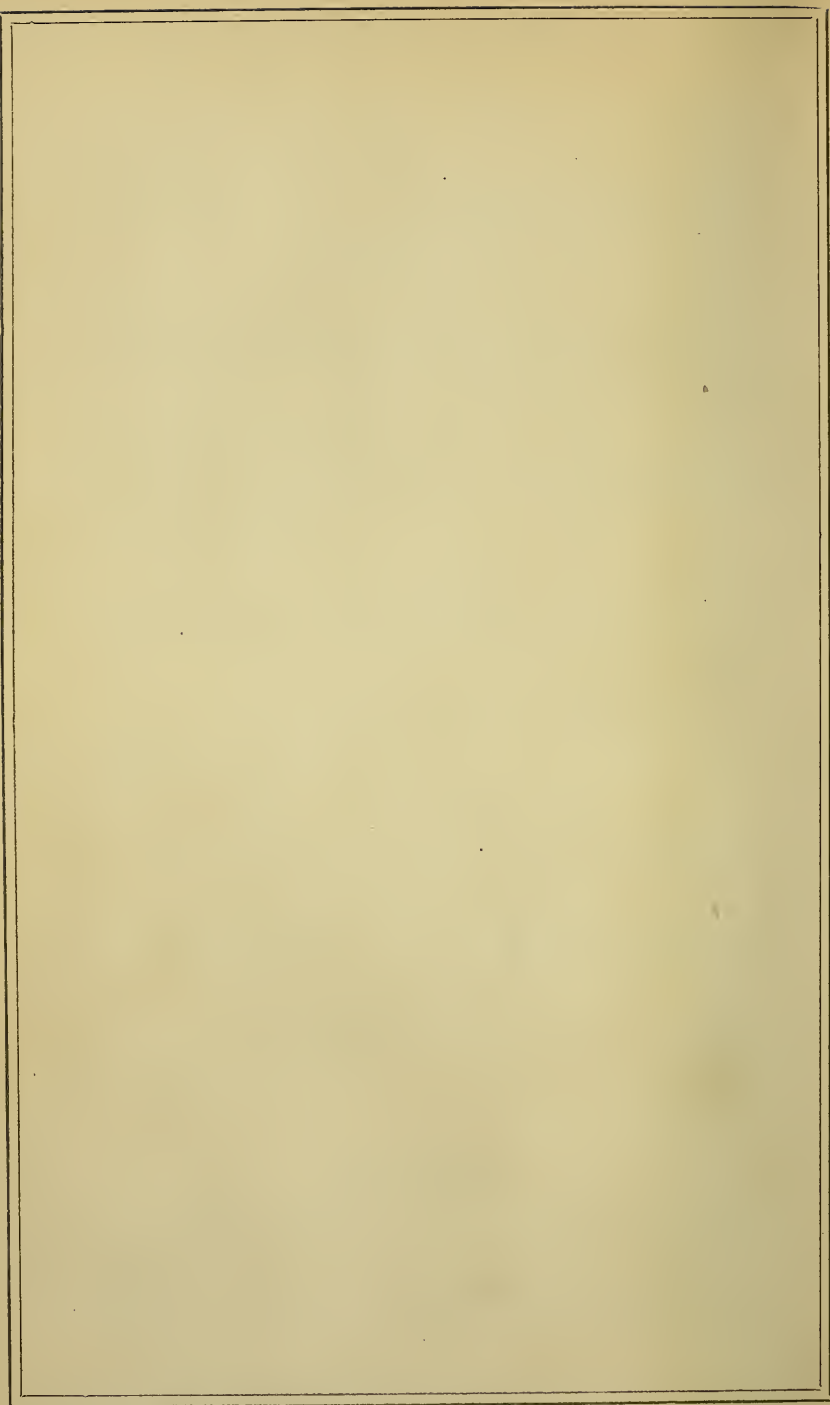

6. The lines joining the middle points of the sides of a quadrilateral form a parallelogram, which is one-half the original figure.

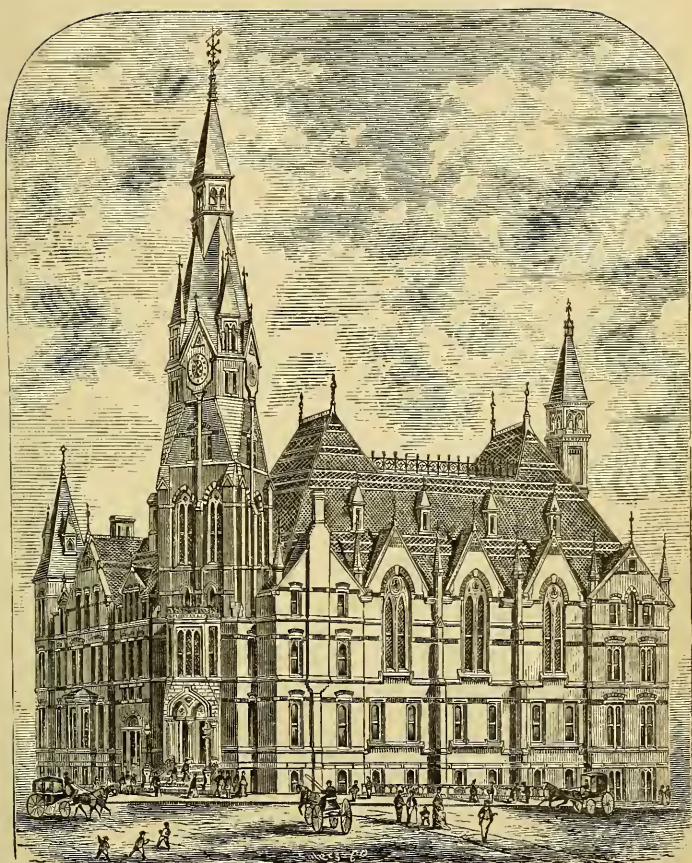

7. If a line be drawn parallel to the base of a triangle, it cuts the other sides proportionally.

8. If from the right angle of a right angled triangle, a line be drawn perpendicular to the base, the perpendicular shall be a mean proportional between the segments of the hypotenuse.

9. If two chords of a circle intersect, the rectangles contained by the segments of the chords are equal.

10. The areas of similar triangles are to each other as the squares of their homologous sides.

# MARYLAND STATE NORMAL SCHOOL.

HE MARYLAND STATE NORMAL SCHOOL, established by the School Law of 1865, and reorganized under the Law of 1868, is intended for the "instruction and practice of Teachers in the science of education, the art of teaching, and the mode of governing schools."

## ADMISSION.

Each county is entitled to send two students for each of its representatives in the General Assembly.

The apportionment is as follows :

Allegany county, 10 ; Anne Arundel county, 8 ; Baltimore county, 14 ; Baltimore city, 42 ; Calvert county, 6 ; Caroline, 6 ; Carroll, 10 ; Cecil, 10 ; Charles, 6 ; Dorchester, 8 ; Frederick, 14 ; Garrett, 6 ; Harford, 10 ; Howard, 6 ; Kent, 6 ; Montgomery, 8 ; Prince George's, 8 ; Queen Anne's, 6 ; St. Mary's, 6 ; Somerset, 6 ; Talbot, 6 ; Washington, 12 ; Wicomico, 6 ; Worcester, 6.

Persons desiring to enter the school should make application to the Board of School Commissioners of their respective counties. The Law requires the appointees to be not less than sixteen years of age if young women, and not less than seventeen if young men. They should have a good elementary education, and must "file a written declaration that their object in obtaining admission is to qualify themselves as Public School Teachers, and that it is their intention to engage in the profession of teaching within the State."

When the legal quota from any county is filled, applicants from that county should address the Principal, enclosing a letter of recommendation from the County Board of School Commissioners.

### SESSIONS.

The School year of nine months is divided into three sessions. The Fall Session commences on the first Tuesday in September. The Winter Session commences on the second Tuesday in December. The Spring session begins on the first Monday in March, and closes on the last Friday in May.

Students will be admitted to entrance in the first week of each session, and not at any other time, unless previous arrangements have been made with the Principal to that effect.

Exception will be made in favor of persons engaged in teaching, who will be received at the close of any of their regular school terms, previous to the first of March.

### EXPENSES.

Students appointed by the County School Boards or by the Baltimore City Board, are under no expense for tuition, books and school stationery.

In addition to the regular appointees, a limited number of students will be received of the proper age and scholastic acquirements, who shall pay twenty-five dollars per session for tuition, and purchase their own text-books. Such students will not be required to file the declaration referred to above.

### BOARDING.

Boarding can be obtained in the city at prices varying from \$4 to \$7 a week. The boarding-houses selected by students must be approved by the Principal before the students are admitted.

Mrs Borgman, Principal of the Girls' Model School, will receive a limited number of young ladies as boarders at the rate of sixty-six dollars per session of three months, payable in advance. Her residence is No. 206 Mosher street.

### COURSE OF INSTRUCTION.

The course embraces all the studies required by the school law to be taught in the public schools of the State, namely: Orthography, Reading, Writing, English Grammar, Geography, History, Arithmetic, Algebra, Book-Keeping, Physiology, Natural Philosophy, Vocal Music, and Drawing. To these are added, English Literature, Latin, Mental and Moral Philosophy, Geometry and Trigonometry.

Chemistry, Botany and Zoology. Provision has also been made for thorough instruction, at the expense of the students, but much below the ordinary rates, in French, German, Painting, Instrumental Music and Telegraphy.

Inquiries are often made regarding the length of time required to complete the course. It is impossible to give a definite answer to this question. The examination for diplomas is open to all students in good standing who have been at the school for three sessions. Experience shows that while some students have graduated in one year, the majority require two years, and many three years.

The main object of the school being to give professional training to those who intend to become teachers, all the departments of study are considered but as means to this end. The diploma of the school is not given on account of regular attendance merely, nor even of high attainments, but on the ground of a fairly developed capacity for teaching and governing, in addition to the requisite amount of scholarship.

For further information, address

M. A. NEWELL,

*Principal of the Maryland State Normal School,*

BALTIMORE, MD.

# FINAL EXAMINATION.

MAY 1875.

## SPELLING.

## ANALYSIS.

True, I talk of dreams ;  
Which are the children of an idle brain,  
Begot of nothing but vain phantasy,  
Which is as thin of substance as the air,  
And more inconstant than the wind, who woos  
Even now the frozen bosom of the North,  
And, being angered, puffs away from thence,  
Turning his face to the dew-dropping South.

## PARSING.

Parse the words in italics:

- "Give *me* thy torch, *boy*: Hence, and stand aloof:—
- "Yet, put it *out*, *for* I would not be seen.
- "*Under yond yew-trees lay thee all along,*
- "*Holding* thine ear close to the hollow ground ;
- "*So* shall no foot *upon* the church-yard tread,
- "Being loose, unfirm, with *digging-up* of graves,
- "*But* thou shalt hear it : whistle *then* to me,
- "*As signal* that thou hears't something approach.

## ENGLISH LITERATURE.

3. Write an anylasis of "Romeo and Juliet."

4. Name the principal authors who were contemporary with Milton.

5. Name three poets, three novelists, and three historians of the Augustan era of English Literature.

6. Write what you know of the etymology and history of each word in the following sentence :

"I remember when I began to read, and take some pleasure in it, there was wont to lie in my mother's parlor (I know not by what accident, for she, herself, never in her life read any book but of devotion), but there was wont to lie Spenser's works; this I happened to fall upon, and was infinitely delighted with the stories of the knights, giants and monsters."—*Cowley*.

## GEOGRAPHY.

1. Describe the general figure and the typical structure of all the Continents.
2. Give the divisions of high Europe, with the names of the projections from each.
3. Explain in detail the causes of ocean currents, and their different directions.
4. Explain the connexion between temperature and latitude; and between temperature and elevation of surface. What difference in elevation would be equivalent to a difference of one degree of latitude, as regards temperature?
5. State the exact boundaries of Maryland, including the different parts of Mason and Dixon's line. Why is the Northeastern part of the boundary incorrectly represented on our maps? What part of the boundary is still unsettled?
6. Describe the Chesapeake Bay within the limits of Maryland. Name its tributaries, and the counties they separate.
7. Describe the Craighill Channel, and explain how it facilitates the approach to the port of Baltimore.
8. Where are the highest mountain ranges in Maryland, and to what geological period do they belong?
9. What is supposed to be the Eastern limit of the coal regions in Maryland?
10. Describe the three great Coal fields in Maryland, particularly the one now worked.

## HISTORY.

Write full notes on the following topics.

1. William the Conqueror. 2. The First Crusade. 3. The Founding of the Church of England. 4. Sir Isaac Newton. 5. Charles I. 6. Benjamin Franklin. 7. The Mexican War. 8. The Sepoy Rebellion. 9. The Alabama Claims. 10. Alfonso XII.

## ZOOLOGY.

I.—Give the parts of a sponge; the organs and their functions; and the composition of the skeleton in different kinds.

II.—Describe the *Euplectella speciosa*.

III.—Give four examples of Radiates, and show how the plan of structure is carried out in each.

IV.—Name the orders of Acephala, Gasteropoda, and Cephalopoda.

V.—Describe an Ascidian, and show its bearing on the Darwinian controversy.

VI.—Describe the Mollusca; particularly in reference to their nervous, digestive and circulatory systems.

VII.—Draw the head of a grasshopper, pointing out the fovea, epistoma and rhinarium.

VIII.—Describe a colony of Termites, and the different kinds of individuals that compose it.

IX.—Tell what you know of the fossils of Maryland.

X.—Why are oysters disappearing from the Sinepuxent Bay and some parts of the Chesapeake?

### BOTANY.

I.—Describe a raceme, and compare it with an *umbel*, a *corymb*, a spike, a head, etc.

II.—Define the terms perfect and complete; regular and irregular; symmetrical and unsymmetrical; as applied to flowers.

III.—Give the characteristics of the Compositae, and name a flower in which the florets are all strap-shaped, and one in which the disk-florets are tubular.

IV.—Describe the *Begonia nitida*, as an example of a monœcious plant.

V.—Give the family characters of the Malvaceae, and an example of three different genera.

VI.—Name and describe some plant belonging to the Solanaceae.

VII.—Give the parts of an apple, and tell what portions of the flower each came from; also, the changes that take place in the progress of growth.

VIII.—Describe Exogens and Endogens in reference to flowers, leaves, seed and growth of the wood.

IX.—Give examples of Thallogens and Acrogens.

X.—Describe the follicle of the *Asclepias cornuti*, explaining the position of the placentae; the dissepiments; and the arrangement and form of the seeds; also compare it with a legume.

### PHYSIOLOGY AND DOMESTIC ECONOMY.

- I. Name and describe the best modes of cooking meat.
2. How is wholesome meat distinguished?
3. Why should potatoes not remain in water after being sufficiently boiled?
4. Compare vegetables and fruits as articles of diet.
5. How may you distinguish good flour?

6. Compare rye and Indian corn with wheat as bread materials, both as regards their nutritious and digestible properties.

7. Describe the effects of highly seasoned food upon the system.

8. Why does the system demand more food in cold than in warm weather?

9. Describe the diet demanded by those who perform mental labor.

10. Should the appetite be bribed? Give reasons for your answer.

11. What means should be used for the preservation of the teeth; why is this care necessary?

12. Describe the passage of the food through the lobby of the throat.

13. Locate the Duodenum, and tell what important work is performed there.

14. Name the different classes of lymphatics, and tell the office of each.

15. Name and locate the main blood-vessel of the body; what is the effect of pressure on this artery?

16. Compare the arteries and the veins, show their resemblances and their differences both in construction and in function.

17. What animal, vegetable and mineral substances have been found in small quantities in the atmosphere?

18. Give the number of cubic feet of fresh air with which a person should be supplied every hour.

19. Explain the different ways in which a room may be ventilated; which do you consider the best; state the objections to the others.

20. Describe the spinal cord and its function.

21. Explain the decussation of the motor and sensitive fibers of the spinal cord.

22. What serious results are produced by injuring the intercostal nerves.

23. Give the divisions of the brain, locate each and tell its function.

24. How are vocal sounds produced in the larynx?

25. Describe the structure of the eyeball, give the function of each part.

### CHEMISTRY.

1. Define a simple body; an atom; a molecule; an acid; a haloid salt; a normal salt.

2. Give the law of definite proportions; the law of multiple proportions; the law of Avogadro; the law of Mariotte; the law of Charles.

3. Classify the following elements according to their quantiv

alence, and give their symbols and atomic weights; Oxygen, Hydrogen, Nitrogen, Carbon, Chlorine, Phosphorus, Iron, Zinc, Potassium.

4. Distinguish between a chemical compound and a mechanical mixture.

5. What is meant by isomerism. Give illustrations.

6. Explain the French system of weights. Reduce 93 grains to grammes.

7. Explain the *Crith* and its uses.

8. How may the following gases be distinguished from each other; O, H, N, CO, CO<sub>2</sub>?

9. Give the history, mode of preparation and properties of Chlorine.

10. What relation exists between the specific heat and the atomic weights of the metals?

11. Name the principal metals of the Alkalies; of the iron class; of the silver class.

12. What metals have a greater commercial value than gold, equal weights being taken?

13. Name the four kinds of glass? Of what chemical compounds does each consist?

14. Define organic chemistry.

15. What is meant by a saturated compound?

16. Give a graphic representation of the mono-carbon series; the di-carbon series; the tri-carbon series.

17. Name the three classes of sugars, and give the characteristics of each.

18. On what does the process of fermentation depend?

19. Name the five principal kinds of fermentation, and give the products of each.

20. Complete and explain the following equations:

## PHYSICS.

1. Define *force*, *power*, *resistance*, and give examples.

2. Explain Equilibrium, and the difference between *stable*, *unstable* and *neutral* equilibrium.

3. What are the conditions essential to an accurate balance?

4. Describe the pendulum, state the laws, and explain its application to the mechanism of a clock.

5. Describe Fortin's Barometer, make a drawing, and explain the method of adjustment.

6. Describe and contrast the air pump, the common lifting pump and the force pump.

7. Describe the siphon and explain its action.
8. Describe the electrophorus.
9. How can you determine the kind of electricity with which a body is charged?
10. Explain the Voltaic pile.
11. Compare Daniel's battery and Grove's battery; show the points of resemblance and difference.
12. Give illustrations of the effects of the voltaic battery (*a*) physiological, (*b*) thermal, (*c*) luminous, (*d*) chemical, (*e*) magnetic.
13. Explain fully the workings of the telegraph.

### ARITHMETIC.

1. A ship 640 miles from shore springs a leak which admits  $3\frac{3}{4}$  tons of water in 12 minutes. 60 tons would suffice to sink her, but the pumps can throw out 12 tons of water in an hour. If her average rate of sailing is 15 miles an hour, how far from the shore will she sink?
2. What is the value of  $(17.2\bar{7} - 3.2\bar{6}) + 7.3$ ?
3. A telegram sent from Paris at seven P. M. reaches New York in two hours and fifty-five minutes afterwards. At what o'clock New York time is it received, New York being in seventy-four degrees three seconds W. Longitude, and Paris in two degrees, twenty minutes and twenty two seconds E. longitude?
4. The cost of carpeting a room twice as long as it is broad at five shillings a sq. yd. amounts to 6£ 2s 6d. and the painting of the walls at nine pence a sq. yd. amounts to 2£ 12s. 6d. Find the height of the room.
5. A offered his house for fifteen per cent. more than it cost him, but afterwards sold it for \$15,525, which was ten per cent. less than his original offer. How much did his house cost him?
6. A B & C enter into partnership, they each put in \$10,000; in four months A withdraws twenty per cent. of his share, and B at the end of two months puts in \$2,000 more; at the end of the year they have cleared \$2,403. Find each partner's share of the profit.
- A invests \$1,000 equally in the shares of two railway companies, the shares of the one are three per cent. and the other at five per cent. discount; the price of stock in the former suddenly rises seven per cent., and that of the latter is depressed five per cent. lower than when the man purchased; if he now sells out, will he gain or lose, and how much?
8. What distance will be saved by taking a diagonal path across a square field, containing ten acres, instead of following the two sides?

9. A walk two feet wide is laid out round a circular plot which has a radius of ten feet. What is the area of the walk?

10. If a pipe two inches in diameter pour 81 gallons into a cistern in a given time, what will be the diameter of a pipe which shall empty  $156\frac{1}{4}$  gallons in the same time?

### ALGEBRA.

1. Simplify  $\frac{(\sqrt{a} + \sqrt{b})(\sqrt{a} - \sqrt{b})}{(\sqrt[4]{a} + \sqrt[4]{b})(\sqrt[4]{a} - \sqrt[4]{b})}$ .

2. Expand  $(1 - a)^{-3}$  into a series.

3. Given  $\frac{1}{x} + \frac{1}{a} = \sqrt{\frac{1}{a^2} + \sqrt{\frac{4}{a^2x^2} + \frac{9}{x^4}}}$ .

4. Given  $\left\{ \begin{array}{l} cx + ay + rz = ac + r(a + c) \\ c^2x + a^2y + r^2z = 3acr \\ \frac{x-r}{ar} + \frac{y-r}{cr} = \frac{c-y}{cr} + \frac{c-z}{az} \end{array} \right\}$ .

5. Given  $x^4 - 4x^3 - 14x^2 + 36x + 45 = 0$ .

6. Given  $\left\{ \begin{array}{l} x + \sqrt{xy} = a \\ y + \sqrt{xy} = b \end{array} \right\}$ .

7. Find the equation whose roots are  $\pm 2a\sqrt{\frac{1}{3}}$ .

8. A man purchased a field whose length was to its breadth as 8 to 5. The number of dollars paid per acre was equal to the number of rods in the length of the field; and the number of dollars given for the whole was equal to 13 times the number of rods round the field. Required the length and breadth of the field.

9. A has  $m$  hours at his disposal, how far may he ride in a coach which travels  $n$  miles an hour, that he may return home in time, walking back at the rate of  $c$  miles an hour.

10. The bases of two triangles are to each other as 17 and 18 and their altitudes as 21 and 23. What is the ratio of the triangles themselves?

## GEOMETRY.

1. If two angles and the included side in one triangle be equal to two angles and the included side in another, each to each, the triangles shall be equal in every respect.
2. In any quadrilateral inscribed in a circle the sum of two opposite angles is equal to two right angles.
3. Equiangular triangles are similar.
4. If two secants are drawn from the same point, and terminate in the concave arc of a circle, the secants and their external segments shall be reciprocally proportional.
5. The perpendicular drawn from the right angle of a right angled triangle to the hypotenuse is a mean proportional between the segments of the hypotenuse.
6. Find a point within a triangle equally distant from the sides.

MARYLAND  
State Normal School,  
LAFAYETTE SQUARE,  
BALTIMORE.

THE MARYLAND STATE NORMAL SCHOOL, established by School Law of 1865, and re-organized under the Law of 1868, is intended for the "instruction and practice of Teachers in the science of education, the art of teaching and the mode of governing schools."

ADMISSION.

Each county is entitled to send two students for each of its representatives in the General Assembly.

The apportionment is as follows :

Allegany county, 10 ; Anne Arundel county, 8 ; Baltimore county, 14 ; Baltimore city, 42 ; Calvert county, 6 ; Caroline, 6 ; Carroll, 10 ; Cecil, 10 ; Charles, 6 ; Dorchester, 8 ; Frederick, 14 ; Garrett, 6 ; Harford, 10 ; Howard, 6 ; Kent, 6 ; Montgomery, 8 ; Prince George's, 8 ; Queen Anne's, 6 ; St. Mary's, 6 ; Somerset, 6 ; Talbot, 6 ; Washington, 12 ; Wicomico, 6 ; Worcester, 6.

Persons desiring to enter the school should make application to the Board of School Commissioners of their respective counties. The Law requires the appointees to be not

less than sixteen years of age if young women, and not less than seventeen if young men. They should have a good elementary education, and must "file a written declaration that their object in obtaining admission is to qualify themselves as Public School Teachers, and that it is their intention to engage in the profession of teaching within the State."

When the legal quota from any county is filled, applicants from that county should address the Principal, enclosing a letter of recommendation from the County Board of School Commissioners.

### SESSIONS.

The School year of nine months is divided into three sessions. The Fall Session commences on the first Tuesday in September. The Winter Session commences on the last Monday in November. The Spring Session begins on the first Monday in March, and closes on the last Friday in May.

Students will be admitted to entrance in the first week of the Fall and Winter Sessions, and not at any other time, unless previous arrangements have been made with the Principal to that effect.

Exception will be made in favor of persons engaged in teaching, who will be received at the close of any of their regular school terms, previous to the first of March.

### EXPENSES.

Students appointed by the County School Boards or by the Baltimore City Board, are under no expense for tuition, books and school stationery.

In addition to the regular appointees, a limited number of students will be received of the proper age and scholastic acquirements, who shall pay twenty-five dollars per session for tuition, and purchase their own text-books. Such students will not be required to file the declaration referred to above.

### BOARDING.

Boarding can be obtained in the city at prices varying from \$4 to \$7 a week. The boarding houses selected by students must be approved by the Principal before the students are admitted.

Mrs. Borgman, Principal of the Girls' Model School, will receive a limited number of young ladies as boarders at the rate of sixty-six dollars per session of three months, payable in advance. Her residence is No. 206 Mosher Street.

### COURSE OF INSTRUCTION.

The course embraces all the studies required by the school law to be taught in the public schools of the State, namely: Orthography, Reading, Writing, English Grammar, Geography, History, Arithmetic, Algebra, Book-keeping, Physiology, Natural Philosophy, Vocal Music and Drawing. To these are added, English Literature, Latin, Mental and Moral Philosophy, Geometry and Trigonometry, Chemistry, Botany and Zoology. Provision has also been made for thorough instruction, at the expense of the students, but much below the ordinary rates, in French, German, Painting, Instrumental Music and Telegraphy.

Inquiries are often made regarding the length of time required to complete the course. It is impossible to give a

definite answer to this question. The examination for diplomas is open to all students in good standing who have been at the school for three sessions. Experience shows that while some students have graduated in one year, the majority require two years, and many, three years.

The main object of the school is to give professional training to those who intend to become teachers, and all the departments of study are considered as means to this end. But the general course is equally adapted to those who have no professional objects in view, and wish merely to obtain a thorough and liberal education. Certificates are given to all who complete the required course, but the diploma of the school, which authorizes the holder to teach in any public school in the State, is not given until after one year's successful experience as a teacher.

## PUNCTUATION

that is not the most perfect beauty which in public would attract the greatest observation nor even that which the statuary would admit to be a faultless piece of clay kneaded up with blood but that is true beauty which has not only a substance but a spirit a beauty that we must intimately know justly to appreciate a beauty lighted up in conversation when the mind shines as it were through its casket when in the language of the immortal poet the eloquent blood spoke in her cheeks and so distinctly wrought that we might almost say her body thought an order and a mode of beauty which the more we know the more we accuse ourselves for not having before discovered those thousand graces which bespeak that their owner has a soul this is that beauty that never cloys possessing charms as resistless as those of the fascinating egyptian for which anthony wisely paid the bauble of a world a beauty like the rising of his own italian suns always enchanting never the same.—*Colton.*

## PARSING AND ANALYSIS.

Analyze the following passage, and parse the words in Italics:

'Tis certain greatness, once *fallen* out with fortune,  
Must fall out with men too: *What* the decline is,  
He shall as soon read in the eyes of *others*,  
As *feel* in his own fall: For men, *like Butterflies*,  
Show not their mealy wings, *but* to the summer;  
And not a man, *for* being *simply man*,  
Hath any Honor; but *honor* for those Honors  
*That* are without him, as *Place*, Riches, Favor,  
*Prizes* of accident as oft as *Merit*;  
*Which* when they *fall*, as *being* slippery *standers*,  
The *Love* that leaned on them as slippery *too*,  
Do one *pluck* down another, and *together*  
Die in the *fall*.—*Shakespeare*.

3. Name the Territories and their capitals?
4. Give the exact boundaries of Maryland?
5. Draw Apgar's triangulation of the Map of Europe?
6. What is the difference between fixed stars and planets; name the latter in the order of distance from the Sun; and also in the order of magnitude?
7. Explain the inequality in the length of day and night, and the changes that occur in this respect as the earth advances in her orbit?
8. What is meant by the phases of the moon? how are they produced?
9. Give a brief statement of Laplace's theory.

## HISTORY.

Write brief notes on the following topics.

1. Oliver Cromwell.
2. Louis XIV.
3. Sir Walter Scott.
4. Robespierre.
5. The change of the calendar.
6. The United Parliament of Great Britain and Ireland.
7. The Mexican War.
8. Queen Victoria.
9. The Sepoy Rebellion.
10. Balaklava.

## PHYSIOLOGY.

Write a short essay upon the following topics, giving information upon all the heads named.

1. THE SKIN.—The layers of which it is composed; the glands, their names and uses; the scarf skin; the necessity of bathing.
2. THE HAIR.—Its structure and mode of growth; the care necessary to preserve it.
3. THE BONES.—Their growth, structure and uses; name and location of the principal bones.
4. THE MUSCLES.—Classes, names and functions; manner of attachment; the principal muscles, name and location; the diaphragm, description and use.
5. THE SALIVA.—Its function; the salivary glands, name and location.
6. THE STOMACH.—Its location; coats, their names and uses; secretion; function.

7. **THE LIVER.**—Location; description; function; secretion; circulation through it.

8. **THE HEART AND LUNGS.**—Make a drawing of these organs accompanied by descriptive chart showing the auricles; the ventricles; the aorta, with arch and upper branches; the pulmonary artery, and the pulmonary vein.

9. **THE CHYLE.**—Its course from its entrance into the duodenum until it is sent through the arteries to all parts of the nervous system.

10. **THE NERVOUS SYSTEM.**—Nerve formation; nervous centers; arrangement of sensitive and motor nerves in the spinal column; reflex action.

### HYGIENE.

1. Why should every housekeeper have a thorough knowledge of physiology.

2. Can the same quantity of food be digested by every one? Give reasons for your answer.

3. In sickness, what course would you pursue for the comfort of the patient.

4. How would you prepare toast-water, rice-water, chicken-broth and lime-water?

10. What are the physiological objections against the wearing of tight clothing?

### CHEMISTRY.

1. Give the symbols of the non-metallic elements, with their atomic weights and tell which are gases, liquids or solids?

2. Distinguish between molecules and atoms?

3. Describe chemical re-actions, and the classes into which they are divided.

4. Define an *acid*, a *base*, and a *salt*; show how each may be formed on the water-type.
5. Complete and explain the equation,  $\text{Zn O} + 2 \text{ H Cl} =$
6. Explain the bleaching action of Chlorine?
7. Make a graphic representation of Nitric Acid.
8. Describe the chemical changes which take place in the burning of a candle?
9. Describe the construction and mode of using Davy's Safety Lamp.
10. How many cubic metres of air are required to burn 400 kilograms of coal, assuming that the coal is pure carbon?

### PHYSICS.

1. What is specific gravity? Describe one method of finding the specific gravity of a solid.
2. What relations do the heat-reflecting, absorbing and emissive powers of substances bear to each other?
3. Give the laws of fusion and ebullition?
4. Under what circumstances will a fog occur?
5. Explain the two theories of light and give reasons in favor of the one which you prefer.
6. Give the laws of reflection and refraction of light.
7. Explain the production of conjugate foci with a concave mirror.
8. State and explain the principles of Photography.
9. Describe a magnet and its action upon a magnetic substance according to the two-fluid theory.
10. Describe the Leyden jar and the changes which take place when the it is charged.

### ARITHMETIC.

1. A contractor, having engaged to dig a canal 6 miles long in 4 weeks, set 234 laborers at work on it; at the end of 1 week, he found they had done but 2,080 yards; how many more men must be hired to have it finished in the required time?
2. A merchant in Philadelphia owes a correspondent in Paris 35,000 francs. Direct exchange on Paris is 5.15, but exchange on London is 4.83 and London exchange on Paris is 25.12. Allowing  $\frac{1}{2}$  per cent. commission for brokerage at London, which is the most advantageous way to remit, and by how much?
3. A man owns a house which rents for \$1,500 annually, and the expenses are 40 per cent. of the rental. He sells it for \$16,000 and invests the money in U. S. 6's at 111; gold being worth 112. Is his income increased or diminished and how much?

4. What is the depth of a cubical cistern that holds 200 barrels of water?

5. How many cubic feet in the mast of a ship, its height being 50 feet, the circumference at one end 5 feet, at the other, 3 feet?

6. Bought a hogshead of sugar, containing 9 cwt. 56 lbs. for \$86.04, and paid \$4.78 for freight and cartage. At what price per pound must it be sold that the gain may be 20 per cent?

7. Find the width of a house whose rafters are 12 feet and 15 feet long, and form a right angle at the point where they meet.

8. Express decimally, one million, two hundred thousand and forty-nine; and twenty-four thousandths. Write the same number in the duodecimal scale.

### ALGEBRA.

1. From  $a\sqrt{\frac{b^2x+b^2}{x-1}}$  take  $b\sqrt{\frac{a^2x-a^2}{x+1}}$

2. Find the value of  $\frac{1+x}{1+\sqrt{1+x}} + \frac{1-x}{1-\sqrt{1-x}}$  when  $x = \frac{\sqrt{3}}{2}$

3. Write down the 2000th term of  $(2a^2 - \frac{1}{4}a^2)^{2002}$

4. Given  $\frac{1}{x-a} - \frac{1}{x-b} = \frac{a-b}{x^2-ab}$  to find the value of  $x$ .

5. Given  $\frac{c}{\sqrt{x}+\sqrt{a}} + \frac{m\sqrt{a}}{x-a} = \frac{m}{\sqrt{x}-\sqrt{a}}$  to find the value of  $x$ .

6. Given  $3x^n\sqrt[3]{x^n} + \frac{2x^n}{\sqrt[3]{x^n}} = 16$ , to find the value of  $x$ .

7. Given  $\begin{cases} x^2 + xy + y^2 = 7 \\ x^4 + x^2y^2 + y^4 = 133 \end{cases}$  to find the values of  $x$  and  $y$ .

8. Given  $\begin{cases} \frac{1}{x} + \frac{1}{y} = a \\ \frac{1}{x} + \frac{1}{z} = b \\ \frac{1}{y} + \frac{1}{z} = c \end{cases}$  to find the values of  $x$ ,  $y$  and  $z$ .

9. A line of given length is bisected and produced: find the length of the produced part, so that the rectangle contained by half the line, and the line made up of the half and the produced part may be equal to the square on the produced part.

10. A has £1,300 which he divides into two portions, and lends at different rates of interest, so that the two portions produce equal returns. If the first portion had been lent at the second rate of interest it would have produced £36; and if the second portion had been lent at the first rate of interest it would have produced £49. Find the rates of interest.

### GEOMETRY.

1. If one angle of a triangle is equal to another, the side opposite the first will be equal to the side opposite the second.

2. If from a point within a triangle two lines be drawn connecting the extremities at the base, the sum of the two lines shall be less than the sum of the sides of the triangle, and the contained angle shall be greater than the angle contained by the sides of the triangle.

3. If one side of a triangle be produced, the exterior angle is equal to the two interior and opposite angles, and the three interior angles of the triangle are equal to two right angles?

4. If a straight line be divided externally in any point, the square on the line is equal to the squares on the two segments diminished by twice the rectangle contained by the segments?

5. One circle, and only one, can be drawn through any three given points not in the same straight line?

6. The angle contained by a tangent to a circle, and a chord drawn from the point of contact is equal to the angle in the alternate segment?

### THEORY OF TEACHING.

1. Develop and illustrate the idea of school as a place for the acquisition of good habits?

2. Consider the question of the original equality or inequality of the mental faculties in different individuals, and its relation to school work?

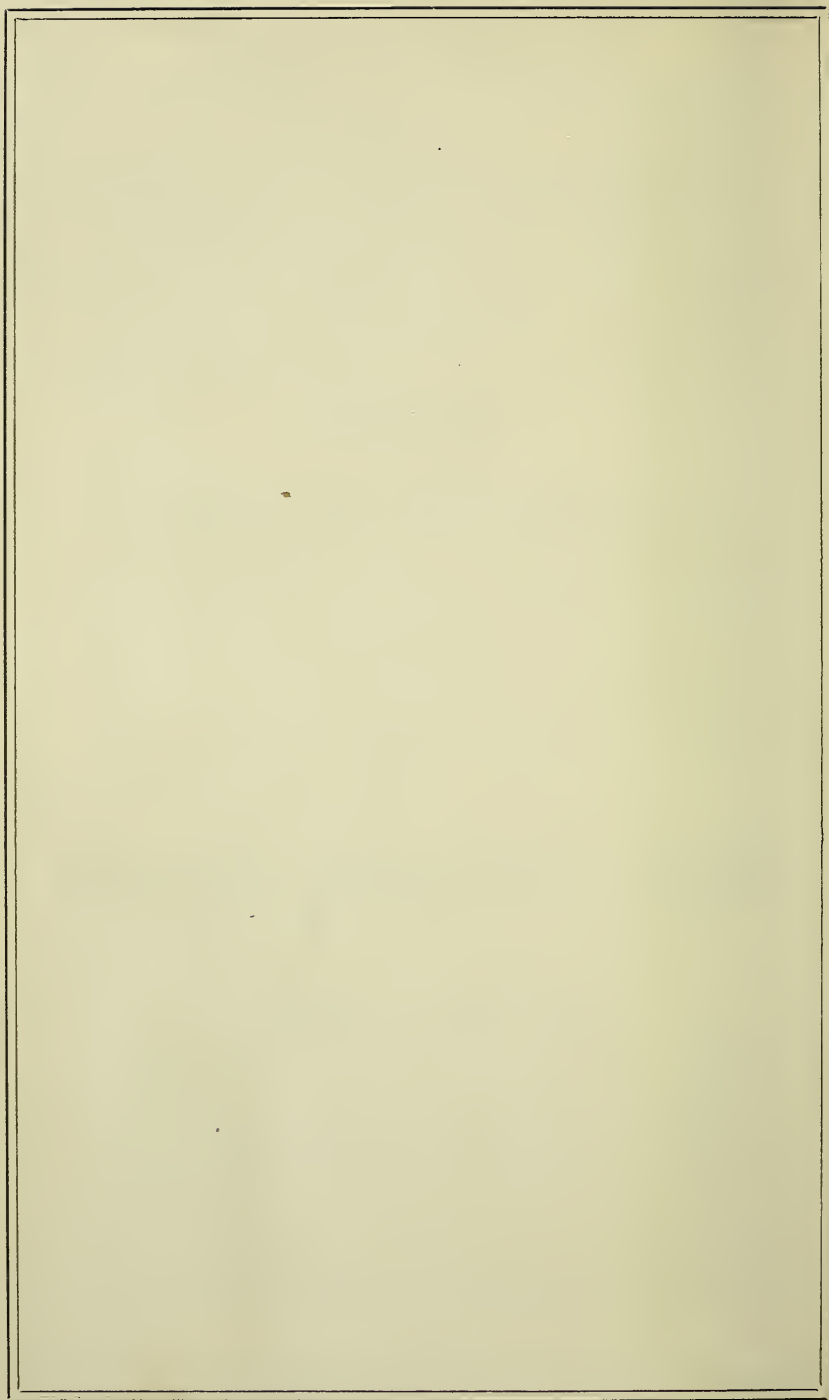

3. Give Sir William Hamilton's division of the mental faculties with some explanation?

4. Give the principal laws of the association of ideas with some illustrations?

5. What branches of ordinary school work may be made to develop the faculty of imagination, and how?

MARYLAND  
State Normal School,  
BALTIMORE.

HE MARYLAND STATE NORMAL SCHOOL, established by the School Law of 1865, and re-organized under the Law of 1868, is intended for the "instruction and practice of Teachers in the science of education, the art of teaching and the mode of governing schools."

ADMISSION.

Each county is entitled to send two students for each of its representatives in the General Assembly.

The apportionment is as follows:

Allegany county, 10; Anne Arundel county, 8; Baltimore county, 14; Baltimore city, 42; Calvert county, 6; Caroline, 6; Carroll, 10; Cecil, 10; Charles, 6; Dorchester, 8; Frederick, 14; Garrett, 6; Harford, 10; Howard, 6; Kent, 6; Montgomery, 8; Prince George's, 8; Queen Anne's, 6; St. Mary's, 6; Somerset, 6; Talbot, 6; Washington, 12; Wicomico, 6; Worcester, 6.

Persons desiring to enter the School, should make application to the Board of School Commissioners of their respective counties. The Law requires the appointees to be selected "by the several Boards of County School Commissioners and the Board of Commissioners of Public Schools of the City of Baltimore, from among persons having scholastic qualifications hereinbefore required for teachers," the evidence of which shall be the certificate of the County Examiner or City Superintendent to that effect. They must be not less than sixteen years of age if young women, and not less than seventeen if young men, and must "file a written declaration that their object in obtaining admission is to qualify themselves as Public School Teachers, and that it is their intention to engage in the profession of teaching within the State."

When the legal quota from any county is filled, applicants from that county should address the Principal, enclosing a certificate of scholastic qualifications and letter of recommendation from the County Examiner.

Students who are under age, or deficient in scholarship, can enter a Preparatory class on paying the Tuition fees.

## SESSIONS.

The School year of nine months is divided into two sessions. The Fall Session commences on the first Tuesday in September. The Winter Session commences on the first Monday in January, and closes on the last Friday in May.

Students will be admitted to entrance in the first week of the Fall and Winter Sessions, and not at any other time, unless previous arrangements have been made with the Principal to that effect.

## EXPENSES.

Students appointed by the County School Boards or by the Baltimore City Board, are under no expense for tuition, books and school stationery.

In addition to the regular appointees, a limited number of students will be received of the proper age and scholastic acquirements, who shall pay twenty-five dollars per session for tuition, and purchase their own text-books. Such students will not be required to file the declaration referred to above.

## BOARDING.

Boarding can be obtained in the city at prices varying from \$4 to \$5 a week. The boarding houses selected by students must be approved by the Principal before the students are admitted.

Mrs. Aiton will receive a limited number of young ladies as boarders at the rate of \$80 for the Fall Session and \$100 for the Winter Session, payable in advance. Her residence is No. 206 Mosher Street, one square from the school.

## COURSE OF INSTRUCTION.

In addition to a review of the elementary studies included in a teacher's certificate of the second grade, the course embraces the studies required for a first grade certificate, namely: Geometry, Algebra, Book-keeping, Physiology and Natural Philosophy. To these are added, English Literature, Latin, Mental and Moral Philosophy, Chemistry, Botany, Zoology, Vocal Music and Drawing. Provision

has also been made for thorough instruction, at the expense of the students, but much below the ordinary rates, in French, German, Painting, Instrumental Music and Telegraphy.

Inquiries are often made regarding the length of time required to complete the course. It is impossible to give a definite answer to this question. The examination for diplomas is open to all students in good standing who have been at the school for one year. Experience shows that while some students have graduated in one year, the majority require two years.

The main object of the school is to give professional training to those who intend to become teachers, and all the departments of study are considered as means to this end. But the general course is equally adapted to those who have no professional object in view, and wish merely to obtain a thorough and liberal education. Certificates are given to all who complete the required course; but the diploma of the school, which authorizes the holder to teach in any public school in the State, is not given until after one year's successful experience as a teacher.

# EXAMINATION PAPERS.

MAY, 1877.

## ENGLISH.

Write from dictation, arrange in metrical lines, and punctuate the following passage. *Par. Lost*, vi. 1--25.

All night the dreadless Angel, unpursued,  
Through Heaven's wide champaign held his way, till Morn,  
Waked by the circling Hours, with rosy hand  
Unbarred the gates of Light. There is a cave  
Within the Mount of God, fast by his throne,  
Where Light and Darkness in perpetual round  
Lodge and dislodge by turns—which makes through Heaven  
Grateful vicissitude, like day and night;  
Light issues forth, and at the other door  
Obsequious Darkness enters, till her hour  
To veil the heaven, though darkness there might well  
Seem twilight here. And now went forth the Morn  
Such as in highest Heaven, arrayed in gold  
Empyrean; from before her vanished Night,  
Shot through with orient beams; when all the plain,  
Covered with thick embattled squadrons bright,  
Chariots, and flaming arms, and fiery steeds,  
Reflecting blaze on blaze, first met his view.  
War he perceived, war in procinct, and found  
Already known what he for news had thought  
To have reported. Gladly then he mixed  
Among those friendly powers, who him received  
With joy and acclamations loud, that one,  
That of so many myriads fallen yet one,  
Returned not lost.

Analyze the following sentence and parse the words in italics. CHAUCER, *Cant. Tales*, *Prolog.* 19—29.

*Byfel* that in that sesoun on a day,  
 In Southwerk at the Tabard as I *lay*,  
 Redy to *wenden* on my pilgrimage  
 To Caunterbury with full devout corage,  
 At night *was come* into that hostelrie  
 Wel nyne and twenty in a compainye,  
 Of sondry folk, by aventure *i-falle*  
 In felaweschipe, and pilgryms were thei *alle*,  
*That* toward Caunterbury *wolden ryde*.  
 The chambres and the stables weren wyde,  
 And wel we weren esed atte beste.

1. When is final *e* not sounded in Chaucer? Of what grammatical inflections is *e* final a remnant? Illustrate from the text as far as possible.
2. Give roots and etymological formation of the following words—corage, aventure, pilgryms, chambres, stables, hostelrie, devout, compainye.
3. Explain the allusions—*Southwerk*, *Tabard*, *Caunterbury*.
4. Give a sketch of Chaucer's life.
5. Give a sketch of the Nonne Prestes Tale.

## PHYSICAL GEOGRAPHY OF MARYLAND.

1. Describe the general contour of Maryland.
2. In what way does the geological formation of the State conform with its contour.
3. Tell what geological ages are represented in the State, and where the rocks belonging to them are principally found.
4. Describe the coal fields.
5. Describe the approach for large vessels to the port of Baltimore.

## PHYSIOLOGY.

1. Into how many departments is Anatomy divided? What is the object of each?
2. What is the effect of exercise upon the muscles? Why should action and rest alternate?

3. Why is the Mucous membrane so called? What is its use and where found?
4. Explain the action of the cross muscles in the Oesophagus.
5. Explain the uses of the three coats of the stomach.
6. Show why vegetables should be eaten with meat.
7. Trace the course of the decayed tissues taken up by the Lymphatics.
8. Into how many groups may food be divided? Give illustrations.
9. Compare wheat, rye, Indian corn, with one another as regards their composition, their digestible and nutritive properties.
10. Give the composition of the blood, and describe the blood globules.
11. Explain the changes in the air during respiration and the necessity for fresh air.
12. Name the Organs of Respiration.
13. Explain the formation of the Spinal Cord and locate it.
14. Locate and describe the fifth pair of Cranial nerves and the effect of irritation upon them.
15. Locate the Tuber Annulare; explain its function.
16. Describe the Crystalline lens, and its uses.
17. Locate the Eustachian tube and tell its functions.

## CHEMISTRY.

1. What is meant by the atomicity of an element? (active, latent, and absolute.)
2. How many grammes of Potassic Chlorate will be required to make thirty litres of Oxygen gas?
3. Write in columns, so as to be compared, the properties of  $\text{CO}_2$ , O, N, Cl, and H.
4. Complete and explain the equation  $\text{CaCO}_3 + 2\text{HCl} =$
5. Describe some processes by which  $\text{CO}_2$  is taken from and restored to the air.
6. Make a graphical representation of Nitric Anhydride.
7. Name some of the impurities of river or spring water and tell how they may be detected.
8. Give some reasons for considering the radical  $\text{NH}_4$  as a metal.
9. Name the principal metals in the following groups and give the proper characteristic properties of the group—Metals of the Alkalies, the Iron class, and the Silver class.
10. Give the four principal types to which most of the compounds of Organic Chemistry are referred.

11. What is the formula for finding the atomicity of the carbon in any of the carbon series? Show how it applies.
12. Give the general characteristics of the saccharine group.

### PHYSICS.

1. Define force and give some instances of the correlation of forces.
2. Show how centrifugal force has affected the shape of the earth.
3. Give Pascal's law of the pressure of fluids and make a sketch of apparatus to illustrate.
4. How can you determine experimentally the pressure of the atmosphere on a given surface.
5. Give the law of the reflection of heat, and show how it is applied to a concave mirror.
6. What influence has pressure on the boiling point of liquids? Give examples.
7. Show the application of the law of inverse squares to the phenomena of sound, heat and light.
8. How is magnetism used in the working of the Electric Telegraph?
9. How would a cloud, charged with negative electricity, affect objects on the earth over which it passed?
10. Describe the elements necessary for the production of a voltaic current and tell what action takes place in a simple voltaic couple.
11. What is the essential point to be considered in the construction of a constant battery?
12. How may heat be changed into Electricity?

### GEOMETRY.

1. The diagonals of a rhombus bisect each other at right angles.
2. Two right angled triangles, having the hypotenuse and one side in one equal to the hypotenuse and one side in the other, each to each, are equal in every respect.
3. An angle at the centre of a circle is double the angle at the circumference standing upon the same arc.
4. Two triangles having the same altitude are to each other as their bases, the bases being incommensurable.
5. Similar triangles are to each other as the squares of their homologous sides.

ALGEBRA.

1. Divide  $x^4 - (a + b + c + d)x^3 + (ab + ac + ad + bc + bd + cd)x^2 - (abc + abd + acd + bcd)x + abcd$  by  $x^2 - (a + c)x + ac$ .

2. Simplify 
$$\frac{\frac{1}{a-x} - \frac{1}{a-y} + \frac{x}{(a-x)^2} - \frac{y}{(a-y)^2}}{\frac{1}{(a-y)(a-x)^2} - \frac{1}{(a-y)^2(a-x)}}$$

3. Given  $\left\{ \begin{array}{l} bex + 2b - cy = 0 \\ b^2y + \frac{a(c^3 - b^3)}{bc} = \frac{2b^3}{c} + c^3x \end{array} \right\}$  to find the values of  $x$  and  $y$ .

4. Given  $\sqrt{\frac{x}{a}} + \sqrt{\frac{(b-c)(ac-bx)}{abc}} = 1$ , to find the value of  $x$ .

5. Given  $\left\{ \begin{array}{l} xy + xy^2 = 12 \\ x + xy^3 = 18 \end{array} \right\}$  to find the values of  $x$  and  $y$ .

6. Given  $\left\{ \begin{array}{l} x^2 + y^2 = 65 \\ xy = 28 \end{array} \right\}$  to find the values of  $x$  and  $y$ .

7. Find the equation whose roots are  $2(1 \pm 2\sqrt{\frac{b}{c}})$ .

8. Find the value of  $(17 + 12\sqrt{2})^{\frac{1}{4}}$ .

9. Cloth, being wetted, shrinks up  $\frac{1}{8}$  in its length and  $\frac{1}{16}$  in its width. If the surface of a piece of cloth is diminished by  $5\frac{3}{4}$  square yards, and the length of the 4 sides by  $4\frac{1}{4}$  yards, what was the length and width of the cloth?

10. A has tea at 3 shillings a pound, and some at 5 shillings a pound; he wishes to mix them so that by selling the mixture at 3 s. 8 d. a pound he may gain 10 per cent. on each pound sold: find how many pounds of the inferior tea he must mix with each pound of the superior.

## ARITHMETIC.

1. The sum of  $1\frac{1}{26}$  and  $\frac{1}{1\frac{4}{9}}$  is equal to how many times their difference?
2. How many barrels of flour at \$9.66 a barrel, must a man give for 75.25 bushels of wheat at \$1.75 a bushel, 57.5 bushels corn at \$.85, and 65.75 bushels of oats, at \$.56 a bushel?
3. A hall 60 ft. long, 40 ft. wide, and 20 ft. high, is capable of seating 600 persons; how long before the air contained in it becomes unfit for respiration, allowing 10 cu. ft. a minute to each person?
4. What is the ratio of 1 peck, 1 quart, 1 pint, to .890625 bushels?
5. The first couplet of a compound proportion is made up of the ratios 5 : 15 and 4 : 16 and the 1st ratio of the 2nd couplet is 4 : 12; what is the other ratio, if the antecedents of the second couplet are as 2 to 7?
6. A bought a quantity of alpaca at 30 cts.; what must the goods be marked that he may throw off 25 per cent. from the marking price, and still make 25 per cent. profit.
7. B, desiring to make a permanent investment, finds three classes of bonds equally secure, 5-s at 70, 6-s at 80, and 7-s at 95; which is the best investment?
8. If a lady married on the first of January received \$1 from her father with a promise of \$5 on first of Feb., \$25 on first of March, and continuing at same rate for a year; what was her dowry?
9. How many sq. ft. of boards will it take to line the 4 sides of a cubical cistern which contains 200 barrels of water, and what will be the price at 5 cts. a sq. ft.?
10. Find the whole surface of a cylinder, of which the altitude is 28 ft., and the circumference of the base 19 ft.

### THEORY OF TEACHING.

1. Explain the difference between grading and classifying a school.
2. Explain the right of a pupil to be kept busy all the time he is in school.
3. How would you occupy children of the two lowest grades when they are not reciting?
4. Explain and illustrate the maxim, "Repetition with Variation."
5. What would you consider a perfect recitation?
6. How would you create an interest in a study?
7. What are the causes of untruthfulness in children, and the remedies?
8. Give a sketch of Grube's system of teaching elementary numbers, and contrast it with the ordinary book method.
9. Do you prefer the black-board or the primer for teaching elementary reading and give reasons.
10. Explain the difference between education and instruction.
11. What steps do you propose to take to secure employment as a teacher?

State Normal School,

BALTIMORE.

---

THE MARYLAND STATE NORMAL SCHOOL, established by the School Law of 1865, and re-organized under the Law of 1868, is intended for the “instruction and practice of Teachers in the science of education, the art of teaching and the mode of governing schools.”

A D M I S S I O N .

Each county is entitled to send two students for each of its representatives in the General Assembly.

The apportionment is as follows :

Allegany county, 10 ; Anne Arundel county, 8 ; Baltimore county, 14 ; Baltimore city, 42 ; Calvert county, 6 , Caroline, 6 ; Carroll, 10 ; Cecil, 10 ; Charles, 6 ; Dorchester, 8 ; Frederick, 14 ; Garrett, 6 ; Harford, 10 ; Howard, 6 ; Kent, 6 ; Montgomery, 8 ; Prince George's, 8 ; Queen Anne's, 6 ; St. Mary's, 6 ; Somerset, 6 ; Talbot, 6 ; Washington, 12 ; Wicomico, 6 ; Worcester, 6 .

Persons desiring to enter the School, should make application to the Board of School Commissioners of their respective counties. The law requires the appointees to be selected "by the several Boards of County School Commissioners and the Board of Commissioners of Public Schools of the City of Baltimore, from among persons having scholastic qualifications hereinbefore required for teachers," the evidence of which shall be the certificate of the County Examiner or City Superintendent to that effect. They must be not less than sixteen years of age if young women, and not less than seventeen if young men, and must "file a written declaration that their object in obtaining admission is to qualify themselves as Public School Teachers, and that it is their intention to engage in the profession of teaching within the State."

When the legal quota from any county is filled, applicants from that county should address the Principal enclosing a certificate of scholastic qualifications and letter of recommendation from the County Examiner.

Students who are under age, or deficient in scholarship, can enter a Preparatory class on paying the Tuition fees.

### SESSIONS.

The School year of nine months is divided into two sessions. The Fall Session commences on the first Tuesday in September. The Winter Session commences on the first Monday in January, and closes on the last Friday in May.

Students will be admitted to entrance in the first week of the Fall and Winter Sessions, and not at any other time, unless previous arrangements have been made with the Principal to that effect.

## EXPENSES.

Students appointed by the County School Boards or by the Baltimore City Board, are under no expense for tuition, books and school stationery.

In addition to the regular appointees, a limited number of students will be received of the proper age and scholastic acquirements, who shall pay twenty-five dollars per session for tuition, and purchase their own text-books. Such students will not be required to file the declaration referred to above.

## BOARDING.

Boarding can be obtained in the immediate neighborhood of the school at prices varying from \$4 to \$5 a week. The boarding houses selected by students must be approved by the Principal before the students are admitted.

Mrs. Aiton will receive a limited number of young ladies as boarders at the rate of \$80 for the Fall Session and \$100 for the Winter Session, payable in advance. Her residence is No. 206 Mosher Street, one square from the school.

## COURSE OF INSTRUCTION.

In addition to a review of the elementary studies included in a teacher's certificate of the second grade, the course embraces the studies required for a first grade certificate, namely: Geometry, Algebra, Book-keeping, Physiology and Natural Philosophy. To these are added, English Literature, Latin, Mental and Moral Philosophy, Chemistry, Botany, Zoology, Vocal Music and Drawing. Provision

has also been made for thorough instruction, at the expense of the students, but much below the ordinary rates, in French, German, Painting, Instrumental Music and Telegraphy.

Inquiries are often made regarding the length of time required to complete the course. It is impossible to give a definite answer to this question. The examination for diplomas is open to all students in good standing who have been at the school for one year. Experience shows that while some students have graduated in one year, the majority require two years or longer.

The main object of the school is to give professional training to those who intend to become teachers, and all the departments of study are considered as means to this end. But the general course is equally adapted to those who have no professional object in view, and wish merely to obtain a thorough and liberal education. Certificates are given to all who complete the required course; but the diploma of the school, which authorizes the holder to teach in any public school in the State, is not given until after one year's successful experience as a teacher.

## SPELLING.

Metaphor, Aphorism, Solace, Irresistible, Intellect, Embellish, Consummate, Conceive, Pedantry, Eliciting, Supplement, Opportunity, Simultaneous, Ceremony, Machinery, Immense, Assignable, Artillery, Density, Umbrellas, Corridor, Alimentary, Elementary, Chromos, Comatose, Competition, Precipice, Promenade, Cruiser, Persuasion, Pursuit, Vicissitude, Disagreeable, Manifold, Axiom, Corollary, Parallelogram, Indicative, Comparative, Inoffensive, Euphony, Repair, Exemption, Beneficent, Dereliction, Fissure, Reference, Harassing, Dentifrice, Refrigerator, Gelatinous.

## ANALYSIS.

I cannot but take notice of the wonderful love of God to mankind, who, in order to encourage obedience to his Laws, has annexed a present, as well as a future reward to a Good Life ; and has so interwoven our Duty and Happiness together, that while we are discharging our obligations to the one, we are at the same time, making the best provision for the other.

## PARSING.

Parse the words in Italics.

What nothing earthly *gives*, or can destroy,  
The soul's calm *sunshine*, and the heartfelt joy,  
*Is* Virtue's prize ; a better would you *fix* ?  
Then give *Humility* a coach and *six*,  
Justice a conqueror's sword, or Truth a gown,  
Or Public Spirit its great cure, a *crown*.  
Weak, foolish *man* ! will Heaven reward us there  
With the same trash mad mortals wish *for* here ?  
The boy and man an individual *makes*,  
Yet sigh'st thou now for apples and for cakes ?

POPE.

## ENGLISH LITERATURE.

1. From what language and in what proportion are the words of the English language derived?
2. Explain the distinction between words which are cognate and those which are derived.
3. Give examples of Celtic and Scandinavian words in our language.
4. At what several periods were Latin words introduced? State the class of words belonging to each period.
5. Give twelve pairs of words nearly synonymous, of which one word in each pair shall be of Saxon origin and the other of French.
6. Give five pairs of words nearly synonymous, one word of each pair coming directly from the Latin and the other through the medium of the French.
7. Explain what is meant by a dialect.
8. Name the three principal dialects of English after the Norman invasion, and give some distinctive peculiarities of each.
9. Which of these became the literary dialect, and what famous writers used it?
10. Divide English literature into five chronological periods, and say something about each.

## BOTANY.

- 1 and 2. Analyze the flower before you. Draw the entire plant, and each part separately.
3. Tell what family the second flower given you belongs to; give reasons. Describe its mode of inflorescence.
4. Describe a spike and compare it with a raceme, an umbel, a corymb and a head.
5. Make a tabular statement of the different forms of venation, with examples of each.
6. How can you distinguish between exogens and endogens?
7. What part does the leaf play in the growth of a plant?
8. What changes take place in the flower of an apple to produce the fruit?

## PHYSIOLOGY.

1. Name the different kinds of tissue found in the nerves; describe each.
2. Name the two great systems of nerves, and tell over what functions each presides.

3. Locate the Medulla Oblongata ; tell over what function it presides.
4. Describe the Sclerotic and Choroid coats of the eye ; tell the function of each.
5. How are sounds conveyed to the Auditory Nerve ?
6. Explain how the muscles are dependent upon the brain for vitality and energy.
7. Why should the brain not be used when the body is tired ?
8. Locate the Duodenum ; tell what important part of the digestion is performed here.
9. Give table showing time taken to digest the following articles :  
Beef roasted rare, beef roasted dry, steak broiled, venison broiled, lamb roasted, pork roasted, veal fried, chicken fricasseed, raw cabbage with vinegar, raw cabbage without vinegar, green corn, boiled potatoes, oysters stewed, milk boiled, eggs boiled soft, rice, cheese, fresh baked bread, sponge cake.
10. Describe a vein, an artery ; what is the remedy if either be cut ?
11. Make a drawing of the heart, showing the auricles, ventricles, and the valves when closed and when open. Describe fully the flow of blood through the heart.
12. Locate and describe the trachea ; make a drawing, showing the trachea with the bronchial tubes and their divisions.

## CHEMISTRY.

1. Determine what is the base of the substance before you and give the result of each test.
2. Make a saturated solution of ammoniac chloride, cause it to re-crystallize, then draw and describe the crystals.
3. How will you test the safety of kerosene oil for illuminating purposes.
4. Give Avogadro's Law and show how, by means of it, the relative molecular weight of substances may be determined.
5. If Hydrochloric acid be added to sodic hydrate describe the reaction and result.

## PHYSICS.

1. Define Inertia and give examples of effects due to it.
2. What forces act upon a body, at the earth's surface to vary its weight ?
3. Draw a compound lever, with arms of different lengths, and calculate the power necessary to sustain a given weight by it.

4. The safety valve of a boiler is three inches in diameter; its point of attachment is four inches from the fulcrum, and the notch for the weight is twenty-four inches from the fulcrum. What weight will be necessary in order that twenty-five pounds pressure per sq. in., in the boiler, will open the valve; neglecting the weight of the lever and valve?

5. How may the weight of a small column of water be made to produce a great pressure?

6. Describe the hydraulic press.

7. Give some illustrations of atmospheric pressure.

8. Mention the three leading qualities of musical sounds, and tell how they are determined.

9. Give some examples of the correlation of forces.

10. What is the most generally accepted theory as to the nature of heat?

11. Prove that light moves in straight lines in all directions from the source; and give examples to show that the illumination of a surface varies inversely as the square of the distance from the source.

12. What is the velocity of light and how was it first determined?

13. What effect has a lens upon a ray of light passing through it?

14. How may a Solar Microscope be made?

15. Describe the action of the earth upon a magnetic needle.

16. Given a steel needle, a piece of cork, a bowl of water, and a magnet with the names of the poles unknown; determine the latter.

17. How can you determine the kind of electricity with which a body is charged?

18. How will you prove that the electricity in a charged Leyden jar is on the surface of the glass?

19. Describe the structure and action of Daniell's battery.

20. Describe Bell's telephone.

### ARITHMETIC.

1. A. having \$55.92, wished to purchase an equal number of pounds of tea, coffee and sugar; the tea at  $87\frac{1}{2}$  cents, coffee at  $18\frac{3}{4}$  cents, and sugar at  $10\frac{1}{4}$  cents. How many pounds of each could he buy?

2. At \$2.75 a rod, how much less will it cost to fence a piece of ground 80 rods square than if the same were in the form of a rectangle twice as long and one-half as wide?

3. A speculator borrowed \$9675, at 6 per cent., April 15, 1874, with which he purchased flour at  $\$6\frac{1}{4}$  per barrel. May 10th, 1874, he sold the flour at  $\$7\frac{3}{8}$  a barrel cash. What did he gain by the transaction?

4. If I have \$36,500 which is the more profitable investment and how much, N. Y. Central 6's at 85 or N. Y. Central 7's at 95?

5. What is the weight of a block of granite 8 feet long 4 feet wide and 10 inches thick, if a similar block 10 feet long 5 feet wide and 16 inches thick weigh 5200 pounds?

6. A garden 400 feet long and 300 feet wide has a walk 20 feet wide laid off from it on each side. What is the ratio between the area of the walk and the area of what remained?

7. Find the cost at 18 cents a square foot, of paving a space in the form of a rhombus, the sides of which are 15 feet, and a perpendicular drawn from one oblique angle will meet the opposite side 9 ft. from the adjacent angle.

8. Find the depth of a cubical vessel that will hold 4000 gals. of water.

# ALGEBRA.

1. Reduce to its lowest terms  $\frac{5x^3 + 2x^2 - 15x - 6}{7x^3 - 4x^2 - 21x + 12}$

2. Multiply  $a\sqrt[n]{b^n + 1}c^{n-1}$  by  $\sqrt[n]{a^n + 1}c^3$

3. When  $x = \frac{\sqrt{3}}{2}$  find the value of  $\frac{1+x}{1+\sqrt{1+x}} + \frac{1-x}{1-\sqrt{1-x}}$

4. Find the greatest term in the expansion  $(1-x)^n$  when  $x = \frac{7}{12}$  and  $n = \frac{8}{3}$

5. Given  $\frac{x+a}{x-a} - \frac{x-a}{x+a} = \frac{b+x}{b-x} - \frac{b-x}{b+x}$  to find the value of  $x$ .

6. Given  $\frac{\sqrt{x^2+1} + \sqrt{x^2-1}}{\sqrt{x^2+1} - \sqrt{x^2-1}} + \frac{\sqrt{x^2+1} - \sqrt{x^2-1}}{\sqrt{x^2+1} + \sqrt{x^2-1}} = 4(x^2-1)$  to find the value of  $x$ .

7. Given  $\frac{x}{a} + \frac{y}{b} = 1, \frac{a}{x} + \frac{b}{y} = 4$ , to find the value of  $x$  and  $y$ .

8. Two persons, A. and B., could finish a piece of work in  $m$  days; they work together  $n$  days, when A. was called away, and B. finished it in  $p$  days. In what time could each do it?

9. Find how many gallons of water must be mixed with 80 gallons of vinegar, which cost fifteen cents a gallon, so that by selling the mixture for twelve cents a gallon, there may be a gain of 10 per cent. on the outlay.

## GEOMETRY.

1. The greater angle of any triangle lies opposite to the greater side.
2. If the opposite sides of a quadrilateral are equal the figure is a parallelogram.
3. From the same point outside a circle, two tangents may be drawn, and only two.
4. The angle contained between a tangent and a chord is equal to the angle in the alternate segment of the circle.
5. If a tangent and a chord be drawn from the same point, the tangent is a mean proportional between the secant and its external segment.
6. The difference between two sides of a triangle is less than the third side.

## LATIN.

State Normal School,

BALTIMORE.

---

THE MARYLAND STATE NORMAL SCHOOL, established by the School Law of 1865, and re-organized under the Law of 1868, is intended for the "instruction and practice of Teachers in the science of education, the art of teaching and the mode of governing schools."

A D M I S S I O N .

Each county is entitled to send two students for each of its representatives in the General Assembly.

The apportionment is as follows:

Allegany county, 10; Anne Arundel county, 8; Baltimore county, 14; Baltimore city, 42; Calvert county, 6, Caroline, 6; Carroll, 10; Cecil, 10; Charles, 6; Dorchester, 8; Frederick, 14; Garrett, 6; Harford, 10; Howard, 6; Kent, 6; Montgomery, 8; Prince George's, 8; Queen Anne's, 6; St. Mary's, 6; Somerset, 6; Talbot, 6; Washington, 12; Wicomico, 6; Worcester, 6.

Persons desiring to enter the School, should make application to the Board of School Commissioners of their respective counties. The law requires the appointees to be selected "by the several Boards of County School Commissioners and the Board of Commissioners of Public Schools of the City of Baltimore, from among persons having scholastic qualifications hereinbefore required for teachers," the evidence of which shall be the certificate of the County Examiner or City Superintendent to that effect. They must be not less than sixteen years of age if young women, and not less than seventeen if young men, and must "file a written declaration that their object in obtaining admission is to qualify themselves as Public School Teachers, and that it is their intention to engage in the profession of teaching within the State."

When the legal quota from any county is filled, applicants from that county should address the Principal enclosing a certificate of scholastic qualifications and letter of recommendation from the County Examiner.

Students who are under age, or deficient in scholarship, can enter a Preparatory class on paying the Tuition fees.

## SESSIONS.

The School year of nine months is divided into two sessions. The Fall Session commences on the first Tuesday in September. The Winter Session commences on the first Monday in January, and closes on the last Thursday in May.

Students will be admitted to entrance in the first week of the Fall and Winter Sessions, and not at any other time, unless previous arrangements have been made with the Principal to that effect.

A special class, *for teachers only*, will open on the last Tuesday in April, and continue for six weeks.

### EXPENSES.

Students appointed by the County School Boards or by the Baltimore City Board, are under no expense for tuition, books and school stationery.

In addition to the regular appointees, a limited number of students will be received of the proper age and scholastic acquirements, who shall pay twenty-five dollars per session for tuition, and purchase their own text-books. Such students will not be required to file the declaration referred to above.

### BOARDING.

Boarding can be obtained in the immediate neighborhood of the school at prices varying from \$4 to \$5 a week. The boarding houses selected by students must be approved by the principal before the students are admitted.

Mrs. Aiton will receive a limited number of young ladies as boarders at the rate of \$80 for the Fall Session and \$100 for the Winter Session, payable in advance. Her residence is No. 206 Mosher Street, one square from the school.

### COURSE OF INSTRUCTION.

In addition to a review of the elementary studies included in a teacher's certificate of the second grade, the course embraces the studies required for a first grade certificate, namely: Geometry, Algebra, Book-keeping, Physiology and Natural Philosophy. To these are added, English Litera-

ture, Latin, Mental and Moral Philosophy, Chemistry, Botany, Zoology, Vocal Music and Drawing. Provision has also been made for thorough instruction, at the expense of the students, but much below the ordinary rates, in French, German, Painting, Instrumental Music and Telegraphy.

Inquiries are often made regarding the length of time required to complete the course. It is impossible to give a definite answer to this question. The examination for diplomas is open to all students in good standing who have been at the school for one year. Experience shows that while some students have graduated in one year, the majority require two years or longer.

The main object of the school is to give professional training to those who intend to become teachers, and all the departments of study are considered as means to this end. But the general course is equally adapted to those who have no professional object in view, and wish merely to obtain a thorough and liberal education. Certificates will be given to all who complete the required course, and to no others; but the diploma of the school, which authorizes the holder to teach in any public school in the State, is not given until after one year's successful experience as a teacher.

State Normal School,

BALTIMORE.

---

THE MARYLAND STATE NORMAL SCHOOL, established by the School Law of 1865, and re-organized under the Law of 1868, is intended for the "instruction and practice of Teachers in the science of education, the art of teaching and the mode of governing schools."

A D M I S S I O N .

Each county is entitled to send two students for each of its representatives in the General Assembly.

The apportionment is as follows:

Allegany county, 10; Anne Arundel county, 8; Baltimore county, 14; Baltimore city, 42; Calvert county, 6; Caroline, 6; Carroll, 10; Cecil, 10; Charles, 6; Dorchester, 8; Frederick, 14; Garrett, 6; Harford, 10; Howard, 6; Kent, 6; Montgomery, 8; Prince George's, 8; Queen Anne's, 6; St. Mary's, 6; Somerset, 6; Talbot, 6; Washington, 12; Wicomico, 6; Worcester, 6.

Persons desiring to enter the School, should make application to the Board of School Commissioners of their respective counties. The law requires the appointees to be selected "by the several Boards of County School Commissioners and the Board of Commissioners of Public Schools of the City of Baltimore, from among persons having scholastic qualifications hereinbefore required for teachers," the evidence of which shall be the certificate of the County Examiner or City Superintendent to that effect. They must be not less than sixteen years of age if young women, and not less than seventeen if young men, and must "file a written declaration that their object in obtaining admission is to qualify themselves as Public School Teachers, and that it is their intention to engage in the profession of teaching within the State."

When the legal quota from any county is filled, applicants from that county should address the Principal, enclosing a certificate of scholastic qualifications and letter of recommendation from the County Examiner.

Students who are under age, or deficient in scholarship, can enter a Preparatory class on paying the Tuition fees.

### SESSIONS.

The School year of nine months is divided into two sessions. The Fall Session commences on the first Tuesday in September. The Winter Session commences on the first Monday in January, and closes on the last Thursday in May.

Students will be admitted to entrance in the first week of the Fall and Winter Sessions, *and not at any other time*, unless previous arrangements have been made with the Principal to that effect.

New Students must be present on Tuesday, September 7th, and former Students desiring a re-examination for promotion, must be present on Wednesday. Classes will be formed on Friday, and regular recitations begin on Monday, September 13th.

### EXPENSES.

Students appointed by the County School Boards or by the Baltimore City Board, are under no expense for tuition, ordinary text-books and school stationery.

In addition to the regular appointees, there will be received, as required by law, a limited number of students of the proper age and scholastic acquirements, "who shall pay twenty-five dollars per session for tuition, and purchase their own text-books." Such students will not be required to file a declaration to become teachers.

### BOARDING.

Boarding can be obtained in the immediate neighborhood of the school at prices varying from \$4.00 to \$5 a week; and within half an hour's walk, at \$3.00 a week. The boarding houses selected by students must be approved by the principal before the students are admitted.

Mrs. Aiton will receive a limited number of young ladies as boarders at the rate of \$80 for the Fall Session and \$100 for the Winter Session, payable in advance. Her residence is No. 206 Mosher Street, one square from the School.

## COURSE OF INSTRUCTION.

In addition to a review of the elementary studies included in a teacher's certificate of the second grade, the course embraces the studies required for a first grade certificate, namely: Geometry, Algebra, Book-Keeping, Physiology and Natural Philosophy. To these are added, English Literature, Latin, Mental and Moral Philosophy, Chemistry, Botany, Zoology, Vocal Music and Drawing. Provision has also been made for thorough instruction, at the expense of the Students, but much below the ordinary rates, in French, German, Painting, Instrumental Music and Telegraphy.

Inquiries are often made regarding the length of time required to complete the course. It is impossible to give a definite answer to this question. The examination for diplomas is open to all students in good standing who have been at the school for one year. Experience shows that while some students have graduated in one year, the majority require two years; and some three years.

The main object of the school is to give professional training to those who intend to become teachers, and all the departments of study are considered as means to this end. But the general course is well adapted to those who have no professional object in view, and wish merely to obtain a thorough and liberal education. Certificates will be given to all who complete the required course, and to no others; but the diploma of the school, which authorizes the holder to teach in any public school in the State, is not given until after one year's successful experience as a teacher.

## ACADEMIC DEPARTMENT.

The Academic Department or Model Schools will open on Monday, September 13, and close on the second Thursday in June.

All the grades belonging to Primary, Grammar, and High Schools are represented. There is no extra charge for Latin, Singing, Drawing and Calisthenics. French, German, and Instrumental Music will be taught at Professors' rates.

Fees from \$40 to \$75 a year, payable half-yearly in advance.

MARYLAND  
State Normal School,  
BALTIMORE.

---

THE MARYLAND STATE NORMAL SCHOOL, established by the School Law of 1865, and re-organized under the Law of 1868, is intended for the "instruction and practice of Teachers in the science of education, the art of teaching and the mode of governing schools."

ADMISSION.

Each county is entitled to send two students for each of its representatives in the General Assembly.

The apportionment is as follows:

Allegany county, 10; Anne Arundel county, 8; Baltimore county, 14; Baltimore city, 42; Calvert county, 6; Caroline, 6; Carroll, 10; Cecil, 10; Charles, 6; Dorchester, 8; Frederick, 14; Garrett, 6; Harford, 10; Howard, 6; Kent, 6; Montgomery, 8; Prince George, 8; Queen Anne's, 6; St. Mary's, 6; Somerset, 6; Talbot, 6; Washington, 12; Wicomico, 6; Worcester, 6.

Persons desiring to enter the School, should make application to the Board of School Commissioners of their respective counties. The law requires the appointees to be selected "by the several Boards of County School Commissioners and the Board of Commissioners of Public Schools of the City of Baltimore, from among persons having scholastic qualifications hereinbefore required for teachers," the evidence of which shall be the certificate of the County Examiner or City Superintendent to that effect. They must be not less than sixteen years of age if young women, and not less than seventeen if young men, and must "file a written declaration that their object in obtaining admission is to qualify themselves as Public School Teachers, and that it is their intention to engage in the profession of teaching within the State."

When the legal quota from any county is filled, applicants from that county should address the Principal, enclosing a certificate of scholastic qualifications and letter of recommendation from the County Examiner.

Students who are under age, or deficient in scholarship, can enter a Preparatory class on paying the Tuition fees.

### SESSIONS.

The School year of nine months is divided into two Terms. The Fall Term commences on the first Tuesday in September. The Winter Term commences on the first Monday in January, and closes on the last Thursday in May.

Students will be admitted to entrance in the first week of the Fall and Winter Terms, *and not at any other time*, unless previous arrangements have been made with the Principal to that effect.

New Students must be present on Tuesday, September 6th, and former Students desiring a re-examination for promotion, must be present on Wednesday. Classes will be formed on Friday, and regular recitations begin on Tuesday, September 13th.

### EXPENSES.

Students appointed by the County School Boards or by the Baltimore City Board, are under no expense for tuition, ordinary text-books and school stationery.

In addition to the regular appointees, there will be received, as required by law, a limited number of students of the proper age and scholastic acquirements, "who shall pay twenty-five dollars per session for tuition, and purchase their own text-books." Such students will not be required to file a declaration to become teachers.

### BOARDING.

Boarding can be obtained in the immediate neighborhood of the school at prices varying from \$4.00 to \$5.00 a week; and within half an hour's walk, at \$3.00 a week. The boarding houses selected by students must be approved by the principal before the students are admitted.

Students who have no acquaintances in the city should make early application to the Principal, who will see that they obtain suitable accommodations. A few can be received into his family.

GENERAL REVIEW of all Studies.

Inquiries are often made regarding the length of time required to complete the course. It is impossible to give a definite answer to this question. The examination for diplomas is open to all students in good standing who have been at the school for one year. Experience shows that while some students have graduated in one year, the majority require two years; and some three years. Students differ very greatly both in natural ability, and acquired preparation. It is not expected that all shall make equal advancement in equal times. To fail to pass an examination is of itself no disgrace. The disgrace lies in the want of due diligence; or, still more, in the desire to seem to be that which one is not.

The main object of the school is to give professional training to those who intend to become teachers, and all the departments of study are considered as means to this end. But the general course is well adapted to those who have no professional object in view, and wish merely to obtain a thorough and liberal education. Certificates will be given to all who complete the required course, and to no others; but the diploma of the school, which authorizes the holder to teach in any public school in the State, is not given until after one year's successful experience as a teacher.

#### ACADEMIC DEPARTMENT.

The Academic Department or Model School will open on Monday, September 13, and close on the second Thursday in June.

All the grades belonging to Primary, Grammar, and High Schools are represented. There is no extra charge for Latin, Singing, Drawing and Calisthenics. French,

German, and Instrumental Music will be taught at Professors' rates.

Fees from \$40 to \$75 a year, payable half-yearly in advance.

State Normal School,

B A L T I M O R E .

---

**T**HE MARYLAND STATE NORMAL SCHOOL, established by the School Law of 1865, and re-organized under the Law of 1868, is intended for the "instruction and practice of Teachers in the science of education, the art of teaching and the mode of governing schools."

A D M I S S I O N .

Each county is entitled to send two students for each of its representatives in the General Assembly.

The apportionment is as follows:

Allegany county, 10; Anne Arundel county, 8; Baltimore county, 14; Baltimore city, 42; Calvert county, 6; Caroline, 6; Carroll, 10; Cecil, 10; Charles, 6; Dorchester, 8; Frederick, 14; Garrett, 6; Harford, 10; Howard, 6; Kent, 6; Montgomery, 8; Prince George, 8; Queen Anne's, 6; St. Mary's, 6; Somerset, 6; Talbot, 6; Washington, 12; Wicomico, 6; Worcester, 6.

Persons desiring to enter the School, should make application to the Board of School Commissioners of their respective counties. The law requires the appointees to be selected "by the several Boards of County School Commissioners and the Board of Commissioners of Public Schools of the City of Baltimore, from among persons having scholastic qualifications hereinbefore required for teachers," the evidence of which shall be the certificate of the County Examiner or City Superintendent to that effect. They must be not less than sixteen years of age if young women, and not less than seventeen if young men, and must "file a written declaration that their object in obtaining admission is to qualify themselves as Public School Teachers, and that it is their intention to engage in the profession of teaching within the State."

When the legal quota from any county is filled, applicants from that county should address the Principal, enclosing a certificate of scholastic qualifications and letter of recommendation from the County Examiner.

Students who are under age, or deficient in scholarship, can enter a Preparatory class on paying the Tuition fees.

## SESSIONS.

The School year of nine months is divided into two Terms. The Fall Term commences on the first Tuesday in September. The Winter Term commences on the first Wednesday in January, and closes on the last Thursday in May.

Students will be admitted to entrance in the first week of the Fall and Winter Terms, *and not at any other time*, unless previous arrangements have been made with the Principal to that effect.

New Students must be present on Tuesday, September 5th, and former Students desiring a re-examination for promotion must be present on Wednesday. Classes will be formed on Friday, and regular recitations begin on Monday, September 11th.

### EXPENSES.

Students appointed by the County School Boards, or by the Baltimore City Board, are under no expense for tuition, ordinary text-books and school stationery.

In addition to the regular appointees, there will be received, as required by law, a limited number of students of the proper age and scholastic acquirements, "who shall pay twenty-five dollars per session for tuition, and purchase their own text-books." Such students will not be required to file a declaration to become teachers.

### BOARDING.

Boarding can be obtained in the immediate neighborhood of the school at prices varying from \$4.00 to \$5.00 a week; and within half an hour's walk, at \$3.00 a week. The boarding houses selected by students must be approved by the principal before the students are admitted.

Students who have no acquaintances in the city should make early application to the Principal, who will see that they obtain suitable accommodations.

GENERAL REVIEW of all Studies.

Inquiries are often made regarding the length of time required to complete the course. It is impossible to give a definite answer to this question. The examination for diplomas is open to all students in good standing who have been in the Senior class for one year. Experience shows that while some students have graduated in one year, the majority require two years; and some three years. Students differ very greatly both in natural ability, and acquired preparation. It is not expected that all shall make equal advancement in equal times. To fail to pass an examination is of itself no disgrace. The disgrace lies in the want of due diligence; or, still more, in the desire to seem to be that which one is not.

The main object of the school is to give professional training to those who intend to become teachers, and all the departments of study are considered as means to this end. But the general course is well adapted to those who have no professional object in view, and wish merely to obtain a thorough and liberal education. Certificates will be given to all who complete the required course, and to no others; but the diploma of the school, which authorizes the holder to teach in any public school in the State, is not given until after one year's successful experience as a teacher.

ACADEMIC DEPARTMENT.

The Academic Department or Model School will open on Monday, September 11, and close on the second Thursday in June.

All the grades belonging to Primary, Grammar, and High Schools are represented. There is no extra charge for Latin, Singing, Drawing and Calisthenics. French, German, and Instrumental Music will be taught at Professors' rates.

Fees from \$40 to \$75 a year, payable half-yearly in advance.
